Paese: France Regione: Occitanie Sottoregione: Pyrénées-Orientales Città: Prades		
Difficoltà: un po' difficile	Grado: v3 a4 III	Tempo totale: 3h
Tempo avvicinamento: 35min	Tempo giaro: 2h	Tempo ritorno: 25min
Altitudine di entrata: 670m	Altitudine di uscita: 500m	Altitudine delta: 170m
Lunghezza del canyon: 650m	Rapel più alto: 15m	Quantità rapelli: 15
Transporto: a piedi	Tipo di roccia: gneiss	Area di ingresso: km ²
Stagione:	Orientamento: Nord	Tempo migliore:
Valutazione: ★ 4.2 (9)	Info: ★ 2.6 (5)	Belay: ★ 2.7 (6)
Specialità:		
Attrezzatura: Corde: 2x20m (1x40m)		
Sintesi: (traduzione alternativa) Very varied fun tour; little rope use; countless jumps and slides; highlight T16; slippery smooth gneiss rock; dark deep pools; many short swimming passages; very aquatic canyon; with a lot of water, individual passages can be dangerous; in the high season, plan for waiting times.		
Idrologia:		
Accesso: (traduzione alternativa) From the town of Prades direction Perpignan (N116) --> at the turnoff (traffic circle) right direction Villerach on the D24b drive up through small village Villerach --> first asphalt then gravel road to the large parking lot (Colle De Forn) --> here you usually share the parking lot with many canyoneers --> about 740Hm.		
Avvicinamento: (traduzione alternativa) From the large parking lot, follow the gravel road until you come to a signposted (left) parking lot --> continue for about 100m to the next strong (right) bend --> from here it goes steeply down to a ruin --> pass the ruin on the left (small yellow signs) --> then keep left until you reach the streambed (blue markings on the trees) (entry altitude approx. 670Hm).		
Giro: (traduzione alternativa) This canyon is very beautiful but has dark pools and many slippery places, at the beginning small walking passages --> then follow countless toboggans that you can easily slide --> the next 2 places you can rappel (2x C14 r.) --> the upper of the 2 rappel you can also slide --> short walking distance --> next slide 8m or li. on the rope traverse to a tree S11 (this place can also be left. T7 --> E3 (r.) --> walking passages with rock windows --> several small slides and climbs in the water (! partly stones in the pool) --> at large boulders jump or rappel (6m) over glued anchors possible (! at much water dangerous current) --> jump or rappel 7m in large pools --> T7 in shallow pools with strong current (at much water r.) --> next slide 8m or r. at the rope railing up to a tree S11 (this place can also be avoided r.) --> T7 --> E3 (r.) --> walking passages with rock windows --> several small slides and climbs in the water (! partly stones in the pool) --> at large boulders jump or rappel (6m) over glued anchors possible (! at much water dangerous current) --> jump or rappel 7m in large pools --> T7 in shallow pools with strong current (! at much water r.) over traversed rope to tree and rappel 12m in big pools) --> T4 (C6 left) --> the highlight of the tour is a slide that first goes 4m shallow and then without seeing the landing 11m in free fall in big deep pools (!slide posture with upper body far back) --> S-curve slide in nice washed out rock pool --> several small toboggans for jumping and sliding --> C15 over chain anchor left. (or R15 right) --> T6, T7 --> S7 (left) --> S7 --> at the last listed jumps and slides it is possible to rappel on the right side if there is a lot of water --> before the last jump there is a rope traverse (left) where the pools can be avoided --> after the last small flat slides there is a bigger pool --> the exit is on the left side at about 500Hm.		

Ritorno: (traduzione alternativa)

The way to the car is on the left via a very steep path out of the canyon --> at the beginning there is a steel cable, then you follow the blue color markings on the trees or rocks --> after a good 30min you come to the starting point (parking lot).

Automatisch importiert von Descente-Canyon.com für Canyon Llech Hésitation entre GD et TGD je dirais donc TGD- la descente reste réservée a une equipe a l'aise avec l'eau vive et qui connaît parfaitement la descente... échelle dans le noir tout passe sauf le rappel tob et la machine a laver (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/237/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Llech GD+ limite TGD, échelle dans le noir, on est passé hors d'eau sur le rappel tob l'obstacle qui suit et la machine a laver, tout le reste est passé dans l'actif, l'ejectable et le tob du surfer y compris, qui poussent vraiment fort dans ces condis mais ça passe si on est aguerri (ps la gerbe de la cascade au niveau du saut sur le rocher était incroyable un vrai geyser) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/237/observations.html>)
