Questo specchio d'acqua può essere utilizzato solo dal 16 aprile al 31 dicembre, in conformità con le norme di pesca del Cantone di Berna.

Specialità:

Attrezzatura:
Corde: 2x40m

Sintesi: (traduzione alternativa)
Very challenging but impressive canyon. Mostly deeply incised with no escape route. Rappels mostly directly in the water jet (can be dangerous if the water level is too high!).

Idrologia:

Accesso: (traduzione alternativa)
Coming from Interlaken, drive past Lauterbrunnen to the valley station of the Schilthorn cable car (Stechelberg). Park here in the paid parking lot.

Avvicinamento: (traduzione alternativa)
Take the gondola from Stechelberg to Gimmelwald (runs every 30 minutes; CHF 12.80 for return trip - as of 2025). From there, follow the signs to Rotstockhütte. At a fork just before the Sefibach, continue left to the exit (water level check), on the right the path leads uphill to the entry (signs continue towards Rotstockhütte). At around 1800m (when the forest thins out) you can see down to the Sefibach. A narrow path leads along a fence down to the stream.

Giro: (traduzione alternativa)
The tour starts with a few smaller waterfalls (<10m) in an open streambed. If there is already too much water here, the emergency exit can be chosen before the narrow main section.
This is followed by a deep section with no escape routes and spectacular waterfalls. The rappel usually takes place directly in the water jet.
The canyon then opens up for approx. 100m - you follow the streambed to the last part of 4 canyons.

Ritorno: (traduzione alternativa)
Exit orographic left - follow the path back to the gondola.

Coordinate:
Inizio del canyon 46.5391 7.8465
Fine del canyon 46.5346 7.8511
Parcheggio Entrata e uscita 46.5561 7.9013

Lots of ice in the upper part, little from the incised part onwards. Most of the stands are easily accessible. Grödel, ice axe (especially for access!) and drill set necessary. Water level picture attached. (traduzione alternativa)

Good anchors; first C8 after the 100m walk is one very difficult to reach bolt, but there is alternative natural anchor on the right side. Foto: normal water level at the start of the canyon.

Normal water level for Sefi. Great canyon. Superiore conditions at the moment. We started in Mürren and walked down to the Stechelberg gondola at the end. (traduzione alternativa)

Beautiful alpine canyon. All the pools are filled with gravel. We started from Gimmelwald. Most of the abseils are in good condition. Very aquatic. The rappels lead through waterfalls. 3 people around 3.5 hours in the canyon. (traduzione alternativa)
