Attrezzatura: Corde: 2x 60m		
Sintesi: (traduzione alternativa) If you love high abseils, this is the place for you. 60m down into the Jungle's Exit in one go. Otherwise a rather short canyon that makes sense in combination with the Kobelache (Kanguru Jumping Canyon).		
Idrologia: (traduzione alternativa) The Müselbach flows into the Kobelache, so the Enz water level can also serve as a reference point for the amount of water.		
Accesso: (traduzione alternativa) Freeway exit Dornbirn Süd and then continue in the direction of Gütle. It is best to leave a bike (or second car) at the inn in Gütle and continue by car in the direction of Ebnit. Cross the Rappenlochschlucht gorge over a bridge and after another 650m a road branches off to the left uphill. Follow this road until you reach a saddle where you can park.		
Avvicinamento: (traduzione alternativa) Follow the road for about 80m until a forest road branches off to the left, which you follow for about 2km until you reach a bridge.		
Giro: (traduzione alternativa) After the bridge, you can already see the first abseil bolt and enter the stream on the orographic right bank. Further small rappels follow, then the high final waterfall. The belay is centered and drilled in well above the edge with a steel snapper. This beautiful, free-hanging rappel over approx. 40m is conquered in one go. First follow the stream and then take a narrow path to the left in the forest. After approx. 300m you come to an old bridge pillar where you descend into the stream again. After another 50 m, you will see a ladder (2025) and climbing tracks on the right leading to a path.		
Ritorno: (traduzione alternativa) Follow the path for 250m until you reach a crossroads. If you take the path to the left, you come to the Kobelache (Kanguru Jumping Canyon). If you want to finish the tour, follow the other path, which later turns into a road back to Gütle. The most fit can now cycle up the steepest public road in Vorarlberg and pick up the car from the parking lot. (around 30 minutes depending on your motivation)

All stands in order. Shortly before the entry there was a landslide that hit the canyon at the exit of the long rappel, but did not cause any problems. one fixed rope is a bit worn, otherwise everything is fine. Very slippery in places. (traduzione alternativa)

Inspection at 0.3m² water level (Enz). Access and return route description was fine, but topographic view and route description rather outdated. New topographic view will follow. Otherwise very beautiful canyon, which was actually more appealing than expected. All stands were very easy to reach. Attention at the last rappel C60. Here you already have to rappel on the 10m raised ledge, as there is no further belay at the bottom of the edge. (traduzione alternativa)
