Paese: France Regione: Auvergne-Rhône-Alpes Sottoregione: Isère Città: Quaix en Chartreuse		
Difficoltà: difficile	Grado: v5 a4 III	Tempo totale: 1h40
Tempo avvicinamento: 15min	Tempo giaro: 1h	Tempo ritorno: 25min
Altitudine di entrata: 400m	Altitudine di uscita: 345m	Altitudine delta: 55m
Lunghezza del canyon: 350m	Rapel più alto: 26m	Quantità rapelli: 4
Transporto: a piedi	Tipo di roccia:	Area di ingresso: km ²
Stagione:	Orientamento: Nord-Ovest	Tempo migliore:
Valutazione: ★ 4.1 (7)	Info: ★ 2.2 (5)	Belay: ★ 2.6 (5)
Specialità:		
Attrezzatura: Corde: 2x30m		
Sintesi: (traduzione alternativa) dark gorge		
Idrologia:		
Accesso: (traduzione alternativa) Leave the city center of Grenoble via the Isère to the NNW and head for the suburb of St-Martin-le-Vinoux on the D 57 (also possible from St Engrève). Now head uphill towards Quaix-en-Chartreuse. About 1 km before this village, the road bends sharply to the right across a side valley of the Vence. Immediately afterwards, park in the excavation pit on the left.		
Avvicinamento: (traduzione alternativa) A few meters back on the road, then a dirt road between forest and meadows descends in a south-easterly direction. On a flat saddle, before the path climbs again, an inconspicuous track runs off to the left (south-east) into the bushes. Follow this - steeply at the end - down to Vence and the entry to Infernet.		
Giro: (traduzione alternativa) The difficulty depends crucially on the - usually quite decent - water flow. Although the stands are usually set up to avoid the jet as much as possible, access to the stand above the 25 m rappel is quite exposed. Whirlpools and rollers then pose a further danger. Video and photos show a low water flow! At times (!) a guide rope was fixed to the right wall, which could be used to stay out of the powerful jet. But then about 40m abseil length above intermediate level. Good to connect with Alloix.		
Ritorno: (traduzione alternativa) After the canyon exit, before the water catchment, turn right up to the aforementioned saddle and from here back to the car.		
Coordinate: Inizio del canyon 45.2511 5.7117 Fine del canyon 45.2519 5.7093

Automatisch importiert von Descente-Canyon.com für Canyon Infernet GD, passé par la cascade classique et non par le bloc coincé. On a doublé la mc en fixe au départ, elle présente des traces d'usures vers le relais de la grande. La mc intermédiaire commence à être bien fatigué. En connaissant le canyon, le débit d'aujourd'hui n'était pas réellement problématique dans les conditions actuelles. Les quelques drossages et petit passage techniques passent sans problèmes. Pour ce qui est du repaire pour le niveau d'eau, si je reprends la proposition (voir les photos du canyon dans la base dc) faite par l'utilisateur @spooky, que je trouve assez pertinente. Le niveau était pile sur la ligne GD, le bloc de départ est un bon indicateur pour estimer la faisabilité ou non de la descente. Descente toujours aussi magnifique à la bonne heure. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2113/observations.html>)

High in this flow, we used the high entrance. We used ropes in some places to approach the anchors for the safty lines. Strong and dangers flow in some places. Good team, extra gear (drill, floatingbag) and prior knowledge of the canyon needed. For most teams it's safer to turn around. Water level photo is taken at the entrance of the canyon.
