Specialità:		
Attrezzatura: Corde: 1x 30m		
Sintesi: (traduzione alternativa) Rappel canyon down to the Vesubie		
Idrologia:		
Accesso: (traduzione alternativa) On the N 202 from Nice in (northern) direction Digne. After 20 km, turn right and continue on the D 2565 up the valley of the Vesubie, not quite 10 km, until just before the village of St Jean la Rivière, the D 19 branches off at an acute angle. It leads us up to the village of Duranus (5 km after the turnoff). A little further down over the bridge, you will find space to park the car in the next left turn.		
Avvicinamento: (traduzione alternativa) Back to the road bridge and down on the right to the first rappel (10 m) into the stream.		
Giro: (traduzione alternativa) About 5 rappel, slide and possible jumps		
Ritorno: (traduzione alternativa) The exit is about 100 m before the canal with plenty of water crosses the Vallon de Duranus. From the canal, a path leads up the orographic left flank to the D 19, which you follow to the left for 900 m to the car. You could also follow the path down to the D 2565, but it is not advisable to move vehicles, as parking on the D 2565 is extremely limited in the narrow canyon here and there is also a risk that the parked car will be broken into by the time you return. The Vallon de Duranus can be combined with the neighboring Vallon de L'Imberguet due to the short time required.

Automaticamente importato da Descente-Canyon.com per Canyon Duranus Petit canyon très joli sans difficulté particulière. Tout est réuni pour s'amuser et s'émerveiller. Arrivé au barrage, suivre le chemin le long de la canalisation. (Fonte: <https://www.descente-canyon.com/canyoning/canyon-debit/2476/observations.html>)

Note on the exit: Exit at the first dilapidated water catchment buildings on the right! Follow the path for 100m and cross the water bridge to the left. Then follow the path (traduzione alternativa)

Automaticamente importato da Descente-Canyon.com per Canyon Duranus Débit correct ++ Tout passe mais parfois bien arrosé. Dans ces conditions quelques ancrages supplémentaires n'auraient pas été un luxe, sur de petits obstacles casse patte qui se désescaladent mais où l'eau pousse.
