Paese: España / Spain **Regione:** Cataluña / Catalunya **Sottoregione:** provincia de Lérida / Provincia de Lleida **Città:** Orgañá

Difficoltà: facile	**Grado:** v2 a2 I	**Tempo totale:** 2h
Tempo avvicinamento: 5min	**Tempo giaro:** 1h30	**Tempo ritorno:** 25min
Altitudine di entrata: 1240m	**Altitudine di uscita:** 1138m	**Altitudine delta:** 102m
Lunghezza del canyon: 1240m	**Rapel più alto:** 18m	**Quantità rapelli:** 4
Transporto:	**Tipo di roccia:**	**Area di ingresso:** km²
Stagione:	**Orientamento:**	**Tempo migliore:**
Valutazione: ☆ 1.8 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
More interesting descent than you might think and that most of its flow is diverted by the canalization to the village.
The water springs most of the year by an upwelling at its head which provides a constant flow throughout the year but it is after rains when it has more atmosphere.
Ideal to initiate in the descent of ravines.

Idrologia:

Accesso: (traduzione alternativa)
We will go to the town of Organya by the C14. Once we get to Organya towards La Seu d'Urgell, with the first car we will take the first street on our left (Mestre cases), we will turn again on the first left (Vilasats), we will reach a track that we will follow until we pass some farms, when we see a farmhouse at the top of the mountain we will take a downhill road on the right hand side in which we will see some elm trees at the end. We will park the first car next to the elms.
With the second car we will return to organya. Follow the C14 towards La Seu until you see a signpost on your left indicating Montanissell-Cape. We will take it and after a while on the left hand side we will see a sign indicating "Font Bordonera" on the left. We will follow it until we reach the picnic area of Font Bordonera, where we will leave the second vehicle.

Avvicinamento: (traduzione alternativa)
We will cross the picnic area by a path and go down a trail, when we can we will get into the riverbed.

Giro: (traduzione alternativa)
Easy descent of open riverbed in which we will find four rappels, the last one being the highest with 18 meters. The rock is covered with travertine so it is not slippery at all. in summer it usually dries out because if the spring does not expel enough water it is all diverted. Between abseil and abseil there are quite a lot of pieces of kicking without any incentive that makes it a little heavy.

Ritorno: (traduzione alternativa)
Once we have descended the last rappel, we will continue climbing up ledges until we see the return path on our left that will take us directly to the car.

Coordinate:

Automatisch importiert von Descente-Canyon.com für Canyon Font Bordonera DC++/GD - : top conditions avec ce débit et le soleil : les cascades sont magnifiques. Pas de problème avec le débit, quasiment toutes les cascades sont très larges. La plus étroite (2ème) est équipée un peu en décalé de l'eau.Fait sans navette depuis le centre d'Organya : 50 min d'approche par le chemin de Santa Fe puis la route de Montanisell et enfin le chemin en contrebas de la route jusqu'à la Font. 30 min de retour par le chemin classique rive gauche. Seul regret : ce n'est pas du tout continu... (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21578/observations.html)
