Paese: Schweiz / Switzerland **Regione:** Kanton Wallis / Canton du Valais **Sottoregione:** Bezirk Brig **Città:** Gondo		
Difficoltà: un po' difficile	**Grado:** v4 a4 II	**Tempo totale:** 3h2
Tempo avvicinamento: 2min	**Tempo giaro:** 3h	**Tempo ritorno:** 0min
Altitudine di entrata: 1056m	**Altitudine di uscita:** 850m	**Altitudine delta:** 206m
Lunghezza del canyon: 620m	**Rapel più alto:** 35m	**Quantità rapelli:** 8
Transporto: Auto facoltativa	**Tipo di roccia:** gneiss	**Area di ingresso:** km²
Stagione: agosto - settembre	**Orientamento:** Nord	**Tempo migliore:** 11-13 Ore
Valutazione: ☆ 4.6 (25)	**Info:** ★ 2.6 (22)	**Belay:** ★ 2.8 (22)

Avvertenzas:
inattivo: *Scarico dell'acqua* (29.09.25 - 24.04.26)
A causa dei lavori sulla condotta in pressione, il canyon rimarrà chiuso durante l'inverno.

Specialità:
Diga (scarico automatico),

Attrezzatura:
Corde: 2x40m

Sintesi: (traduzione alternativa)
Beautiful aquatic gneiss canyon; several jumps and slides (after checking the water depth); several slippery passages; automatic power station; information may be obtained from Lokals (www.zwischenbergenschlucht.ch); several emergency exits on the left side; rock arch in the lower part; partly difficult rope retrival; some belays bent but still sufficient; best entry time approx. 11am as northern exposure.

Information about the dam from:
Energie Electrique du Simplon SA tel. +41 (0)27 966 54 00.
Possibly the municipal administration of Gondo: +41 (0)27 979 15 01

Possibly the Gondo municipal administration: +41 (0)27 979 15 01
It is highly recommended to check the water level in advance from the lowest wooden bridge (key point).
In collaboration with professionals from the region’s canyoning industry, a prevention plan has been developed. It is based primarily on operational measures designed to limit the risk of overflow during the day.
Specifically, this means that the risk remains low as long as the inflowing water can be stored in the reservoir, even in the event of an unforeseen shutdown of the Gondo power plant. However, since storage capacity is limited, this safety margin can change rapidly throughout the day.
To keep the public as well-informed as possible, EES has set up a dedicated website: https://ees-canyoning.ch. This site provides the best possible real-time estimate of the time until which no overflows are expected. This estimate is based on the latest available meteorological and hydrological forecasts, though a margin of uncertainty must be taken into account (on the order of 15 minutes).
Recommendations for Users
• Visit the site regularly to get the latest information.
• Assess the situation on-site, taking local weather conditions into account.
• Factor in margins of uncertainty when planning your trip.
When possible, the page also lists the dates of upcoming operational events (water releases, flushing operations) that will temporarily prevent canyoning. Any technical issues or unusual operating conditions will also be posted on the site.

Accesso: (traduzione alternativa)
From Domodossola on the SS33 in the direction of the Simplon Pass (Switzerland). In Gondo, just after the Swiss border (before the petrol station) turn left down to the parking lot. Here the shuttle car can be parked right next to the exit. With the 2nd car, drive up the mountain road (several serpentine bends) behind the parking lot. After the last hairpin bend there are a few houses. Park here before the small fork left at the mirror.

Avvicinamento: (traduzione alternativa)
(on foot: 20min)
From the parking lot, walk a few meters until you see clear climbing tracks into the stream (1056m). Without a shuttle car, follow the mountain road to the "Stockalperweg" hiking trail, which crosses the road a few times. After about 20 minutes you reach the parking entry.

Giro: (traduzione alternativa)
The continuously watery canyon offers slides, jumps and rappels into pools, some of which are very deep. The water level and water depth should always be checked beforehand! Some pools recede when the water level rises. The abseiling sections, especially in the lower part (key section), also become very dangerous. The canyon remains very entertaining until the end, but should never be underestimated. One of the highlights in the lower part is a huge rock arch under which you can swim (possible jumps). Before the final waterfall, you can decide whether to leave or continue downclimbing (C40+ downclimb).

Ritorno: (traduzione alternativa)
You can get out of the canyon at about 920m before the last waterfall on the left via a small path. This leads to the road and shortly back to the parking lot.
2nd option: You can rappel about 40m over the last waterfall and climb the rest right over stone slabs to the confluence of the Doveria at 850m. Then get off to the parking lot on the left.

Automatisch importiert von Descente-Canyon.com für Canyon Gondo Entrer dans l'eau à 11h pour le soleil c'était nickel ! Le guide a eu la même idée que nous pour l'horaire de départ d'ailleurs ???? On commence direct avec le gros tobb éjectable avec corde fixe pour ce mettre en place ! Quelques équipements artificielle pour les différents sauts des guides et les chemins de traverses font comprendre qu'il y a du passage !Comme dit avant il est préférable de garder la corde en main sur le R10 pour aller chercher le relais RD bien glissant et haut a l'entrée de l'encaissement et attention au frottement !Ont a pris le premier relais RG juste avant l'arche pour prendre le gros tobb par l'entrée sèche c'est de la boulette ! Bellissima e divertente forra con vari toboga e tuffi su roccia bella levigata e pozze profonde. Parcheggio macchina direttamente al uscita con comodo tavolo e panchina per fare merenda post-forra. Avvicinamento tranquillo, in ca. 25 minuti si arriva al ingresso. Forra comunque breve, da fare come seconda forra in giornata se si é in zona

Automatisch importiert von Descente-Canyon.com für Canyon Gondo Fait en milieu d'après-midi, au vu de la température de l'eau on aurait quand même préféré avoir un peu plus de soleil ! Le premier toboggan passe très bien, faire attention quand même aux suivants où il peut parfois rester pas mal de sable mais rien de dramatique. Il peut être judicieux de garder la corde en place au niveau du R10 qui précède directement le R30 afin d'assurer le second pour qu'il puisse se longer sereinement au relais qui est placé un peu haut. Superbe canyon très ludique avec des toboggans et des sauts à la pelle. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2750/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Gondo Top conditions.La C25 dans la partie nommée "l'encaissement" sur la topo s'atteind depuis le bas de la C10, attention de ne pas glisser dans la C25 ! Perso je suis resté sur la corde pour atteindre les ammarage de la C10 qui sont un peu haut à attraper.Splendide canyon.
