Avvertenzas:
Serpenti velenosi
Sono presenti sia serpenti velenosi (Vipera dal Corno, vipera cornuta, vipera della sabbia) che non velenosi. Controllate attentamente il sentiero; l'uso di un bastone da passeggio può rivelarsi utile nell'erba alta.

Corde: 2x60

Sintesi: (traduzione alternativa)
Beautiful rappel canyon. Can be easily combined with Cirosolin, Stuet or Ciol dela Meda. Was completely renovated on 9.6.2023 for the Raduno Regionale. Nevertheless, you should always have an emergency drill kit with you, as the stream can carry massive debris and repeatedly tear away stands. The entry to the canyon is via a side stream with an abseil point before you reach the confluence with the Ciol del Pes (highest waterfall 50m). Beautiful abseils, some directly in the water.

Idrologia:

Accesso: (traduzione alternativa)
From Claut drive into Val Sentimana for about 30 minutes. Pass the parking lot of Ciorosolin. The final waterfall of Ciol del Pes is visible from the road and is the same as for Ciol de la Meda. Be careful when entering Val Sentimana! Depending on the time of year and the day, you may have to pay to enter the valley (this is checked).

Avvicinamento: (traduzione alternativa)
CAI Trail No. 366 begins on the orographic left side of the waterfall (right next to the parking lot; sign for C.ra Pramaggiore). Follow the trail until you reach a fork after about 35 minutes. Turn left here (sign: C.ra Pramaggiore) and walk downhill for another 10 minutes until you reach the tributary of the Ciol del Pes. This is where the hike begins.
In June 2026, we encountered a viper at the exit of the approach; please be careful.

Giro: (traduzione alternativa)
In the tributary of the Ciol del Pes there is a rappel (approx. 30m), followed by the confluence with the Ciol del Pes. There are 2 ways to rappel here. Either stay with the tributary and over a rope traverse to the chain anchor and then rappel the 50m, or downclimb into the Ciol del Pes and rappel from there. This is followed by several abseils in a narrower gorge area before it becomes more open again. Beautiful tour with some rappels in the water.

Ritorno: (traduzione alternativa)
Walk 3 min to the parking lot.

Coordinate:
Parcheggio Entrata e uscita 46.3409 12.5797
Inizio del canyon 46.3490 12.5784
Fine del canyon 46.3419 12.5782

Your local Claretto, best walked in summer conditions with no thunderstorm. Ciorosolin, Meda and Pes are the canyons most affected by the storm a few years back.

Beautiful waterfalls at the start. Then it’s mostly flat, with some walking. The last waterfall is pretty. (traduzione alternativa)

In 2025, our team fully re-equipped the canyon with Raumer 12 mm resin anchors and double-bolt belays throughout.

On the fifty-meter rappel (which takes you to Col Del Pes) there was a yellow sign with a skull and the words: Attention muerte. That made us nervous. :D So we went down the right side. First, we went down, then about 30 meters of abseiling. Then there are two more stairs... each one can be about 7 meters high. Everything is very slippery and covered with moss. After the thirty-meter abseiling, we couldn't find another stand. It was late, we didn't have time, so we decided to retreat. We climbed back up and on the left above the fifty-meter abseil, we used a quite convenient emergency exit.

Good water level, on the 2nd rappel after the confluence we used a floating anchor for safety, so that you don't get in at the bottom at the water level (traduzione alternativa)

All anchors ok, flow still very nice for the time of year, things get interesting from the 2nd abseil with some beautiful longer ones. To complete the day with nearby canyons. (traduzione alternativa)
