**Specialità:**

**Attrezzatura:**
Corde: 2x 35m

**Sintesi:** (traduzione alternativa)
Canyon without difficulty, suitable for beginners, still doable when other streams have too much water flow.

**Idrologia:**

**Accesso:** (traduzione alternativa)
Take the B13 from Locarno or from the opposite direction from Riazzino to Gordola. There we turn downhill into Via Gaggiole, after 350m turn left again into Via Mulini. Another 250m further on, before the bridge over the Carcale, we turn left into Via Cecchino. We now drive 230m and park the car near the hairpin bend - view of the final waterfall.

**Avvicinamento:** (traduzione alternativa)
20m further uphill on the road we turn right up a path that takes us to the municipal water reservoir. Continuing steeply uphill through the sparse forest, we reach a cross path and keep right. After a few meters, a path on the right descends to the lower entry. For the upper access, continue uphill until you reach another water reservoir at the top of a small hill. Beyond the hill, the trail enters the streambed. See trail map:

**Giro:** (traduzione alternativa)
In a forest canyon rich in vegetation, running trails alternate with waterfalls (about 15).

**Ritorno:** (traduzione alternativa)
After the last waterfall (C25) in the stream out to the road and the car.

All good, some renovation work has been carried out on the stands. Some improvisation is still needed in various places. Dead chamois out of the water. (traduzione alternativa)

Slippery to walk. Plenty of metal plus trees. Lots of wood in the canyon. Very nice single pitches. Two new anchors set and various stands brought back into shape. Dead chamois on the streambed outside the water.  (traduzione alternativa)

Aging anchors, double stands partly destroyed. High water level, but only two water contacts in the stream. (traduzione alternativa)

No problem even when there is a lot of water, as you almost never have to rappel in the jet. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Carcale A lot of wood in the Canyon. Ok, when the most Canyons carried too much water. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2656/observations.html)
