Automatisch importiert von Descente-Canyon.com für Canyon Robana Entre gros petit filet et petit débit correct avec quelques nages où on apprécie la combinaison. Plutôt mignon sans être incontournable. Il faudra faire attention si parcouru en gros débit parce que les désescalades ne sont pas équipées et glissent l'enfer. Équipement en bon état (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23545/observations.html)

Easy path untill the beginning of the canyon, first rapel on a tree on the left. Actually not really interesting untill the bridge when the final sequence begin, If u want to avoid this part there is a path o the right that bring to that bridge.before the last 50 rapel One anchor completely missed, you can do on the three or jump carefully on your back. Anchor could be definitly improved.

Armi ok, anche se i doppiaggi potrebbero essere migliorati ed alcune cordine fisse sostituite

Shortly done in the afternoon, good start tour after 6 hours drive to prepare for the next days. Most of the anchors were ok, on the penultimate rappel before the 50-pitch anchor on the intermediate belay completely loose. The highlight is the final waterfall. (traduzione alternativa)

Good alternative when all other gorges have too much water. It smells a bit like stale water. Installations are good. (traduzione alternativa)
