<b>Specialità:</b> Ghiacciaio nel bacino idrografico, Diga, Cattura dell'acqua,		
<b>Attrezzatura:</b> Corde: 2x 30m		
<b>Sintesi:</b> (traduzione alternativa) A polished, small and watery glacial stream with very beautiful rock formations		
<b>Idrologia:</b> (traduzione alternativa) Observe online water measurement from flimselectric.  !!! ATTENTION: As of 2025, the residual water quantity from Flimselectric may be incorrect! According to their data, the amount of water should have changed by at least a factor of 5 during our tour, but we have not observed any relevant changes in the amount of water during our tour !!!!  Reference values:  < 80l/sec: OK  80l/sec - 200l/sec = average water level  200l/sec - 350l/sec: high water level - dangerous!  > 350l/sec: Acute danger to life!  Emergency shutdowns of the turbine are possible at any time. Operators should also be able to handle significantly more water.		
<b>Accesso:</b> (traduzione alternativa) Take the FlemXpress cable car from Flims to Startgels. Alternatively, take the bus to Alp Nagens and walk down to Flem.		
<b>Avvicinamento:</b> (traduzione alternativa) Summer access: From the Startgels cable car station, take the hiking trail directly along the stream to Punt Desch (several bridges over Flem). At an altitude of around 1830m, the entry into the still open streambed opens up.  Winter access: From the Startgels cable car station along the edge of the ski slope up to Punt Desch. Punt Desch is the Flem bridge between parts I and II (entry Flem II into the large pool 20m below the bridge from the right-hand side, in winter rope in directly upstream of the bridge if necessary, the anchor comes after the 1m jump orog. left).		

**Giro:** (traduzione alternativa)

Quickly we come to the beginning of the small-limbed and not very deep gorge. We climb and cling downwards in a polished stone structure, interrupted by some smaller rappels and swim sections. Also a forced siphon awaits us. We have to crawl under some rock arches. Then the narrow ganng opens and we come to Punt Desch, where we can either get out or follow the ascent of the second part.

**Ritorno:** (traduzione alternativa)

If we get off at the bridge, we orient ourselves on our approach route in the direction of the Startgels cable car station and drive down to the parking lot at the valley station.

**Coordinate:**

Automatisch importiert von Descente-Canyon.com für Canyon Flem Dernier jour de fonctionnement du téléphérique avant l'hiver. Prix exorbitants : 60 francs suisses pour l'aller-retour à Startgels depuis Flims. Au moins, le téléphérique semble fonctionner correctement maintenant. Les relevés du débit résiduel à la prise d'eau du Segnes semblent erronés ; pendant notre randonnée, il a fluctué entre 200 et 60 litres par seconde, sans que nous ayons constaté de changement dans le canyon. Une belle excursion avec un niveau d'eau sportive. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22626/observations.html>)

One of the most beautiful canyons there is. Perfect amount of water in Flem I and Felm II, Flem III was sporty. Weather conditions were perfect. Several groups were on the way. We used the last opportunity of the season to take the FlemExpress to Startgels, and later also back to Flims from Startgels. Flimselectric's residual water volume appears to be incorrect. According to their information, the amount of water should have changed by a factor of at least 5 during our tour, but we did not observe any relevant changes in the amount of water during our tour. Automatisch importiert von Schlucht.ch für Canyon Flem, Wasserstand: "Mittel" Verankerungen: "Ok" (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1220-flem>)

2025-10-18 | Patrik Bartel |★★★★★|📖|📍☆☆| |👍 Completato

It was sunny. (traduzione alternativa)

2025-10-17 | Joey CIA |★★★★★|📖|📍☆☆|🌊 Normale |👍 Completato

Tip top, clear turquoise water, pure sun. Water level normal+. Lots of cool jumps, natural bridges. Anchors i.o (traduzione alternativa)

2025-10-17 | Christoph Cramer |★★★★★|📖☆☆|📍☆☆|🌊 Normale |👍 Completato

By bus to Nagens and from there 1h access. Few slippery spots, water level manageable throughout. Stands all OK. Some wood in the lower part. Descent on foot in 1h10 to Flims. (traduzione alternativa)

Automatisch importiert von Schlucht.ch für Canyon Flem, Wasserstand: "mittlerer Wasserstand" Verankerungen: "gut (INOX), lediglich im FLEM 3 fehlt an der Deviation um den Siphon herum der 3.Haken (Bolzen ist noch da und Gewinde sieht unbeschädigt aus) - man kommt jedoch trotzdem sicher runter." Haben im Zuge der Fortbildung der Fachspezialisten Canyoning der Alpinen Rettung Schweiz FLEM 1-3 gemacht. Klares Wasser, Sonnenschein von 10.30 bis 14 Uhr in der Schlucht. FLEM 1 & 2 nahezu frei von Holz. FLEM 3 mit viel Holz. Am letzten Wasserfall von FLEM 3 kein Haken auffindbar, sind links zur neuen Station der Gondel ausgestiegen. (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1220-flem>)
