Accesso: (traduzione alternativa)
Parking exit:
From Belluno on the SP 1 over the Piave in a south-westerly direction, past Limana and Trichiana to Mel (16.5 km). Drive through Mel and continue for 1.8 km on the SP 1 towards Feltre. Then turn left to Villa di Villa and on to Tiago. At the end of Tiago, take the narrow road to the right (Rui - Colade). Follow this road for approx. 3 km. Park at a water basin on the left. You may also be able to park further ahead, near a bridge over the Rui.

Parking entry: Back to Tiago and before the village turn right downhill towards Castello di Zumelle. Before you reach the Castello, turn right onto Via Nabie towards Val Maor. Stay on the sand road until you come to an asphalt road again, here turn right towards Praderadego. Follow this road for about 3 km until an asphalt road on the left leads to a small parking lot.

Avvicinamento: (traduzione alternativa)
Just above the crossroads, a forest road begins that crosses into the Val de le Prese. Follow this road to its exit and descend without a path to the right to the streambed. Do not descend too soon, the stream is deeper than it appears from above.

Giro: (traduzione alternativa)
Long, narrow corridor in the layered limestone. Even in dry months, there are pools in the lower third that you probably won't be able to spread out. At the highest waterfall, the abseil bolt is on the right behind the edge.

Ritorno: (traduzione alternativa)
After the canyon opens up, walk through the streambed for about 25 minutes, then descend on a forest road on the left. If the forest road runs along the streambed, it is best to stay in the streambed (farm on the right) until you reach a bridge. Follow the sand road downstream to the parking lot

Got in too early, which meant two abseils in the steep forest. Beautiful gorge, but I would only do it again with a water passage. (traduzione alternativa)
