Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
South-facing canyon - parallel to the Rasiga - with a beautiful ambience, but also a distinctly sporty touch.

Idrologia:

Accesso: (traduzione alternativa)
From the center of Domodossola, first head towards Bognanco. When you reach the bridge over the Torrente Bogna, do not turn left and continue towards Bognanco, but cross the bridge and about 350m further on turn left towards Monteossolano. We park our car in the large parking lot in front of the village (780m altitude).

Avvicinamento: (traduzione alternativa)
We cross the village and then take the trail "D4" to the (ruined) Alpe Pertus (1075m altitude). Continue uphill on the "D4" - roughly parallel to the Variola - towards Alpe Corte, La Balma. At 1110m altitude and a few meters before a side stream, an inconspicuous track goes off to the left and we arrive at a footbridge in the stream (1140m altitude). In various descriptions are described entries further up and further down.

Giro: (traduzione alternativa)
After the first few pools and some walking passages, the stream begins to wind its way through the gorge. There are nearly a dozen rappels in total, but also a few possible jumps. It makes sense to end the descent at the dam, since continuing down to the entry into the lower part is just tiring.
If you do want to stay in the stream and continue on to the Inferiore, you'll face about 45 minutes to 1 hour of intense boulder climbing. Knowledge of improvised anchors is necessary, as there are no pre-drilled bolts and some sections require rappelling.

Ritorno: (traduzione alternativa)
After climbing the wall, we take the path that descends along the left bank. We meet the connecting path Monsignore - Monteossolano "D0". On the right we go to the entry to the lower Variola. We go left and so we come back to Monteossolano and to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Variola (supérieur) De très beaux passages , mais au final quand même beaucoup de marche.Couleur de l’eau magnifique. Un ancrage de la première très belle cascade rencontrée a sauté. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2653/observations.html)

All sections were fine—beautiful dark pools, some of which were slippery. We also took the Inferiore route and stayed in the stream. It took us 45 minutes to get through the boulder field, but we were moving faster than that. In some places, you have to use boulders as anchors; otherwise, you can’t get any further. (traduzione alternativa)

2026-08-30 | Enrico Rispoli | |🕮 |⚓ | 〰 Alto | 👎 Non fatto
Si pensava di farlo integralmente ma portata a nostro parere troppo alta non avendo mai fatto il canyon, si è optato per il Valletta che ne ha moolta meno.
