Corde: 2x20m

Sintesi: (traduzione alternativa)
Fun Canyon

Idrologia:

Accesso: (traduzione alternativa)
From Grenoble on the new A 51 southward in the direction of Sisteron (or via N 75) to Monestier-de-Clermont (approx. 35 km). From the northern edge of the town, take the D 8 to St. Guillaume (6.5 km). From here, continue on the D 242 in the direction of St. Andeol. After about 1 km, we come to the bridge (Pont de la Massette) that spans the little river Gresse. Before the bridge the track on the left and after about 100m we come to a small electric plant. Park the first vehicle near here.
With the second back to the bridge and up to St. Andeol, we pass through the village and a few meters after the end of the village we come to a road that leads down to the left to the hamlet of Chazeaux. Just at the beginning of this road, a parking lot is designated on the right in the meadow for the gorges (2009).
If you come by motorhome, you will find a designated overnight spot with a water tap by continuing on the main road for another hundred meters or so, then turn left.

Avvicinamento: (traduzione alternativa)
We hike through the hamlet of Chazeaux and follow the track that descends and crosses a side stream of the Berrième at the edge of the forest. We follow the tracks downhill on the right bank of the side stream, later we come across a slightly wider track and follow it until we see the Berrième and can descend to the streambed.
From the camper site approach according to Wikiloc link.

Giro: (traduzione alternativa)
A popular canyon with two very different parts (first a narrow gorge, then a rappel canyon), connected by a relatively long stretch where you occasionally walk along trails at the edge of the stream.
Pollution in the area is detectable by its odor. A few jumps and a slide are possible at the exit of the tour.

Ritorno: (traduzione alternativa)
After the prominent double step with the final high slide out to the right and on clear tracks down to the Gresse, cross this and to the vehicle at the E-Werk. Here also toilet.

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières DC-. Saut de l'ex-planche ok. Le tob de la fin ne passe plus du tout (avec une corde qui descend a 2-3 mètre de l'eau la réception est violente) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Comme annoncé à l'ouverture début juin, les 2 dernières vasques se sont remplies de galets et graviers....En espérant que les prochaines crues hivernales et printanières revident ces vasques (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Sympathique petit cayon bien équipé. Par contre le saut dans l'avant dernière vasque ne passe plus (1m d'eau), et 1,10m d'eau à la réception du dernier toboggan (nous avons fait en rappel).L'eau n'était pas chaude malgré la température extérieure. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html)
