Paese: France Regione: Auvergne-Rhône-Alpes Sottoregione: Isère Città: St. Guillaume		
Difficoltà: non così difficile	Grado: v3 a3 III	Tempo totale: 2h50
Tempo avvicinamento: 15min	Tempo giaro: 2h30	Tempo ritorno: 5min
Altitudine di entrata: 880m	Altitudine di uscita: 690m	Altitudine delta: 190m
Lunghezza del canyon: 1500m	Rapel più alto: 17m	Quantità rapelli: 8
Transporto: Auto facoltativa	Tipo di roccia:	Area di ingresso: km ²
Stagione:	Orientamento:	Tempo migliore:
Valutazione: ★ 3.4 (3)	Info: ★ 2 (1)	Belay: ★ 3 (1)
Specialità:		
Attrezzatura: Corde: 2x20m		
Sintesi: (traduzione alternativa) Fun Canyon		
Idrologia:		
Accesso: (traduzione alternativa) From Grenoble on the new A 51 southward in the direction of Sisteron (or via N 75) to Monestier-de-Clermont (approx. 35 km). From the northern edge of the town, take the D 8 to St. Guillaume (6.5 km). From here, continue on the D 242 in the direction of St. Andeol. After about 1 km, we come to the bridge (Pont de la Masette) that spans the little river Gresse. Before the bridge the track on the left and after about 100m we come to a small electric plant. Park the first vehicle near here. With the second back to the bridge and up to St. Andeol, we pass through the village and a few meters after the end of the village we come to a road that leads down to the left to the hamlet of Chazeaux. Just at the beginning of this road, a parking lot is designated on the right in the meadow for the gorges (2009). If you come by motorhome, you will find a designated overnight spot with a water tap by continuing on the main road for another hundred meters or so, then turn left.		
Avvicinamento: (traduzione alternativa) We hike through the hamlet of Chazeaux and follow the track that descends and crosses a side stream of the Berrière at the edge of the forest. We follow the tracks downhill on the right bank of the side stream, later we come across a slightly wider track and follow it until we see the Berrière and can descend to the streambed. From the camper site approach according to Wikiloc link.		
Giro: (traduzione alternativa) Well-frequented canyon with two quite different parts (first small-scale gorge, later rappel canyon) connected by a relatively long passage, where at times you walk on paths on the edge of the stream. An existing contamination is recognizable by the smell. Some jumps and a slide possible at the exit of the tour.		
Ritorno: (traduzione alternativa) After the prominent double step with the final high slide out to the right and on clear tracks down to the Gresse, cross this and to the vehicle at the E-Werk. Here also toilet.		
Coordinate: Inizio del canyon 44.9511 5.5528 Fine del canyon 44.9541 5.5686 Parcheggio all'entrata 44.9577 5.5513 Parcheggio in uscita 44.9547 5.5694

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Dc+, il y a un point à visser a l'avant dernier ressaut. Point de droite. nous n'avons pas de clé. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Descente effectuée avec 2 amis non initiés. Je n'avais jamais fait le canyon mais si je n'avais pas vu le commentaire de Marie j'aurais dit DC+. Mes potes sont descendus sans trop de problème même dans la première cascade bien arrosée. La corde pour le dernier ressaut de la première partie est bien touchée et on a vu un rondin avec des marches bien plus bas dans le lit de la rivière. La planche est effectivement manquante, pareil on a sauté de 3m. Par contre pour le toboggan on l'a fait quasiment depuis le haut, pas de corde, désescalade de 1m ou 2 puis on s'engage dedans. Ça passe en amortissant bien mais il y a 1m70 de fond donc attention. Les mains courantes sont plutôt en bon état. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Beaucoup de cordes en mauvais état. Nous avons mis les nôtres. Equipement RAS. les petits tobs passent bien. La planche a disparue. 2m de fond. L avant dernière vasque est complètement engravée. Plus de saut possible. Le dernier toboggan passe du milieu. Un gd merci à Paul qui a eu la gentillesse de nous remonter à l'intermédiaire. un noeud s'est formé sur l'anneau en remontant la corde sur la C17. Improbable! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Un dc- aujourd'hui. La planche étant cassée, c'est sympa de descendre par le tob à droite. Le saut à l'avant dernière vasque est évidemment impossible, mais le tob final passe (ça touche quand même...) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)
