

# Mühltobel (unterer Abschnitt)

Dafinser unten, Unterer Dafinser Mühltobel

Creare: 2023-08-09 10:18:42	Aggiornamento: 2025-08-25 08:40:21	Stampa: 2025-12-07 10:12:05
Paese: Österreich / Austria    Regione: Vorarlberg    Sottoregione: Bezirk Feldkirch    Città: Dafins		
Difficoltà: non così difficile	Grado: v3 a2 II	Tempo totale: 1h40
Tempo avvicinamento: 5min	Tempo giaro: 1h30	Tempo ritorno: 5min
Altitudine di entrata: 660m	Altitudine di uscita: 570m	Altitudine delta: 90m
Lunghezza del canyon: 510m	Rapel più alto: 18m	Quantità rapelli: 8
Transporto: Auto facoltativa	Tipo di roccia: limestone	Area di ingresso: 11.80km²
Stagione:	Orientamento: Ovest	Tempo migliore: 9-13 Ore
Valutazione: ★ 4 (8)	Info: ★ 2.5 (8)	Belay: ★ 2.9 (8)
Specialità:		
Attrezzatura: Corde: 1x20m, 1x 30m		
Sintesi: (traduzione alternativa) Small rappel canyon, not without charm. Mostly slippery.		
Idrologia: (traduzione alternativa) <a href="https://vowis.vorarlberg.at/stationsInfo/tbl_Abflusstationen.aspx">https://vowis.vorarlberg.at/stationsInfo/tbl_Abflusstationen.aspx</a> Water flow mostly moderate, good alternative if there is too much water elsewhere. No tributaries, no bottlenecks.		
Accesso: (traduzione alternativa) Coming from the A14, take exit 31 (Klaus) and head towards Röthis. We follow the Schlöblestraße until before the bridge over the Frödisch. There is a wood processing plant here, where there are gravel areas with logs to the left and right of the road. Park the first car here (please note the no-stopping signs and company exit!).  Take the second car over the bridge in the direction of Dafins. Park the second car in one of the bays.		
Avvicinamento: (traduzione alternativa) From the parking lot in the hairpin bends, descend a little to the next haipin bend. Follow the clearly visible path and cross into the valley. Pass two wooden buildings and continue down towards the stream. Beware of the risk of slipping. There are several fixed ropes here to make the descent to the entry easier. After a few minutes you reach the entry point.		

**Giro:** (traduzione alternativa)

The tour is quite easy and suitable for beginners.

Starting with approx. 150m of walking passages in the streambed with some woodwork, we come to the first rappel C10. Here, after approx. 7m, there is a jump out of the chute. Jumping is often possible. However, if the water level is very low, be sure to check the pool beforehand. It is not possible to slide out of the chute, as a rock protrudes directly below the waterfall.

After further downclimbing in the tree mikado, we come to a fixed rope R2. This was no longer accessible on the last tour (August 25). However, it can be bypassed on the right by downclimbing. The following C3 can also be downclimbed to the left.

After another 150m of walking passages, we reach a rope traverse on the right to the chain anchor R8. Continue over another rope traverse to the C10 orographic left. After this rappel, go directly to the rope traverse of the maximum rappel C18 on the left.

This is followed by approx. 100m walking passages over several tree trunks. We come to a slide T4. Attention: the arrival pool is not too deep. Alternatively, you can rappel here via a single bolt on the right. The chain anchor to the final abseil C10 is located directly afterwards.

All belays are equipped with chain anchors. Only the rappel at the slide consists of a single bolt.

**Ritorno:** (traduzione alternativa)

After the last waterfall, turn right onto a clearly visible path. Follow this trail a few meters through the forest until you reach the road. Follow this down to the second car or up to the car.

## Rapporti:

2025-09-14 | Betschart Stefan | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normale | 🍏 Completato

All three parts done. Nice grip and all stands io. You can't jump anywhere because everything is quite full of gravel. (traduzione alternativa)

2025-08-23 | Fabian Preiß | ★★★★★ | 📖★★★★ | ⚓★ | 🌊 Alto | 🍏 Completato

Jump at the first rappel currently not feasible, pool gravelled over after flooding. A rope traverse was torn away, we were able to improvise with dead wood, see photo. With less water it will probably be possible without. Otherwise everything is ok but you can see the tracks from the flood and a lot of gravel in the canyon. (traduzione alternativa)

2025-08-21 | Mario Rojer | ★★★★★ | 📖★ | ⚓★★★★ | 🌊 Alto | 🍏 Completato

As the Kobelache had too much water, we did the lower Mühltofel. Jump is possible, as is the slide before the final abseil. Stream very smooth as usual. Anchors all intact. As always a nice tour. (traduzione alternativa)

2025-06-30 | Wolfgang Streicher | ★★★★★ | 📖★★ | ⚓★★★★ | 🌊 Basso | 🍏 Completato

Everything ok. Slippery. Little water. Jump possible. Direct access to the lower part - without jump and running route, start directly below the house on the right at the edge of the path - apparently no longer used. Video: <https://youtu.be/ihYfvFW-CL0> Photos: <https://photos.app.goo.gl/VEqGhiqLo7Ly3TVt7> (traduzione alternativa)

2025-06-19 | Iotama | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Basso | 🍏 Completato

Low water level, but otherwise everything is great. A zip line is possible in two places (once with an anchor opposite and quite towards the end on a tree opposite) (traduzione alternativa)

2024-07-22 | Christian Balla | ★★★★★ | 📖★ | ⚓★★★★ | 🌊 Normale | 🍏 Completato

Anchoring in good condition. Thin 2 to 3 mm neo is fresh in summer but tends to be sufficient. The parts were mixed up in the description, I will correct that. In any case, 60m of rope is not necessary in the lower part, with 2x20m or 1x40m (+ emergency rope) you can get through this part safely. Reparking hardly saves any time here. (traduzione alternativa)

2024-04-14 | Bastien P. | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normale | 🍏 Completato

Anchors all perfectly intact. Some are really grippy and others are very slippery. (traduzione alternativa)

2023-08-12 | Daniel Sturm | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normale | 🍏 Completato

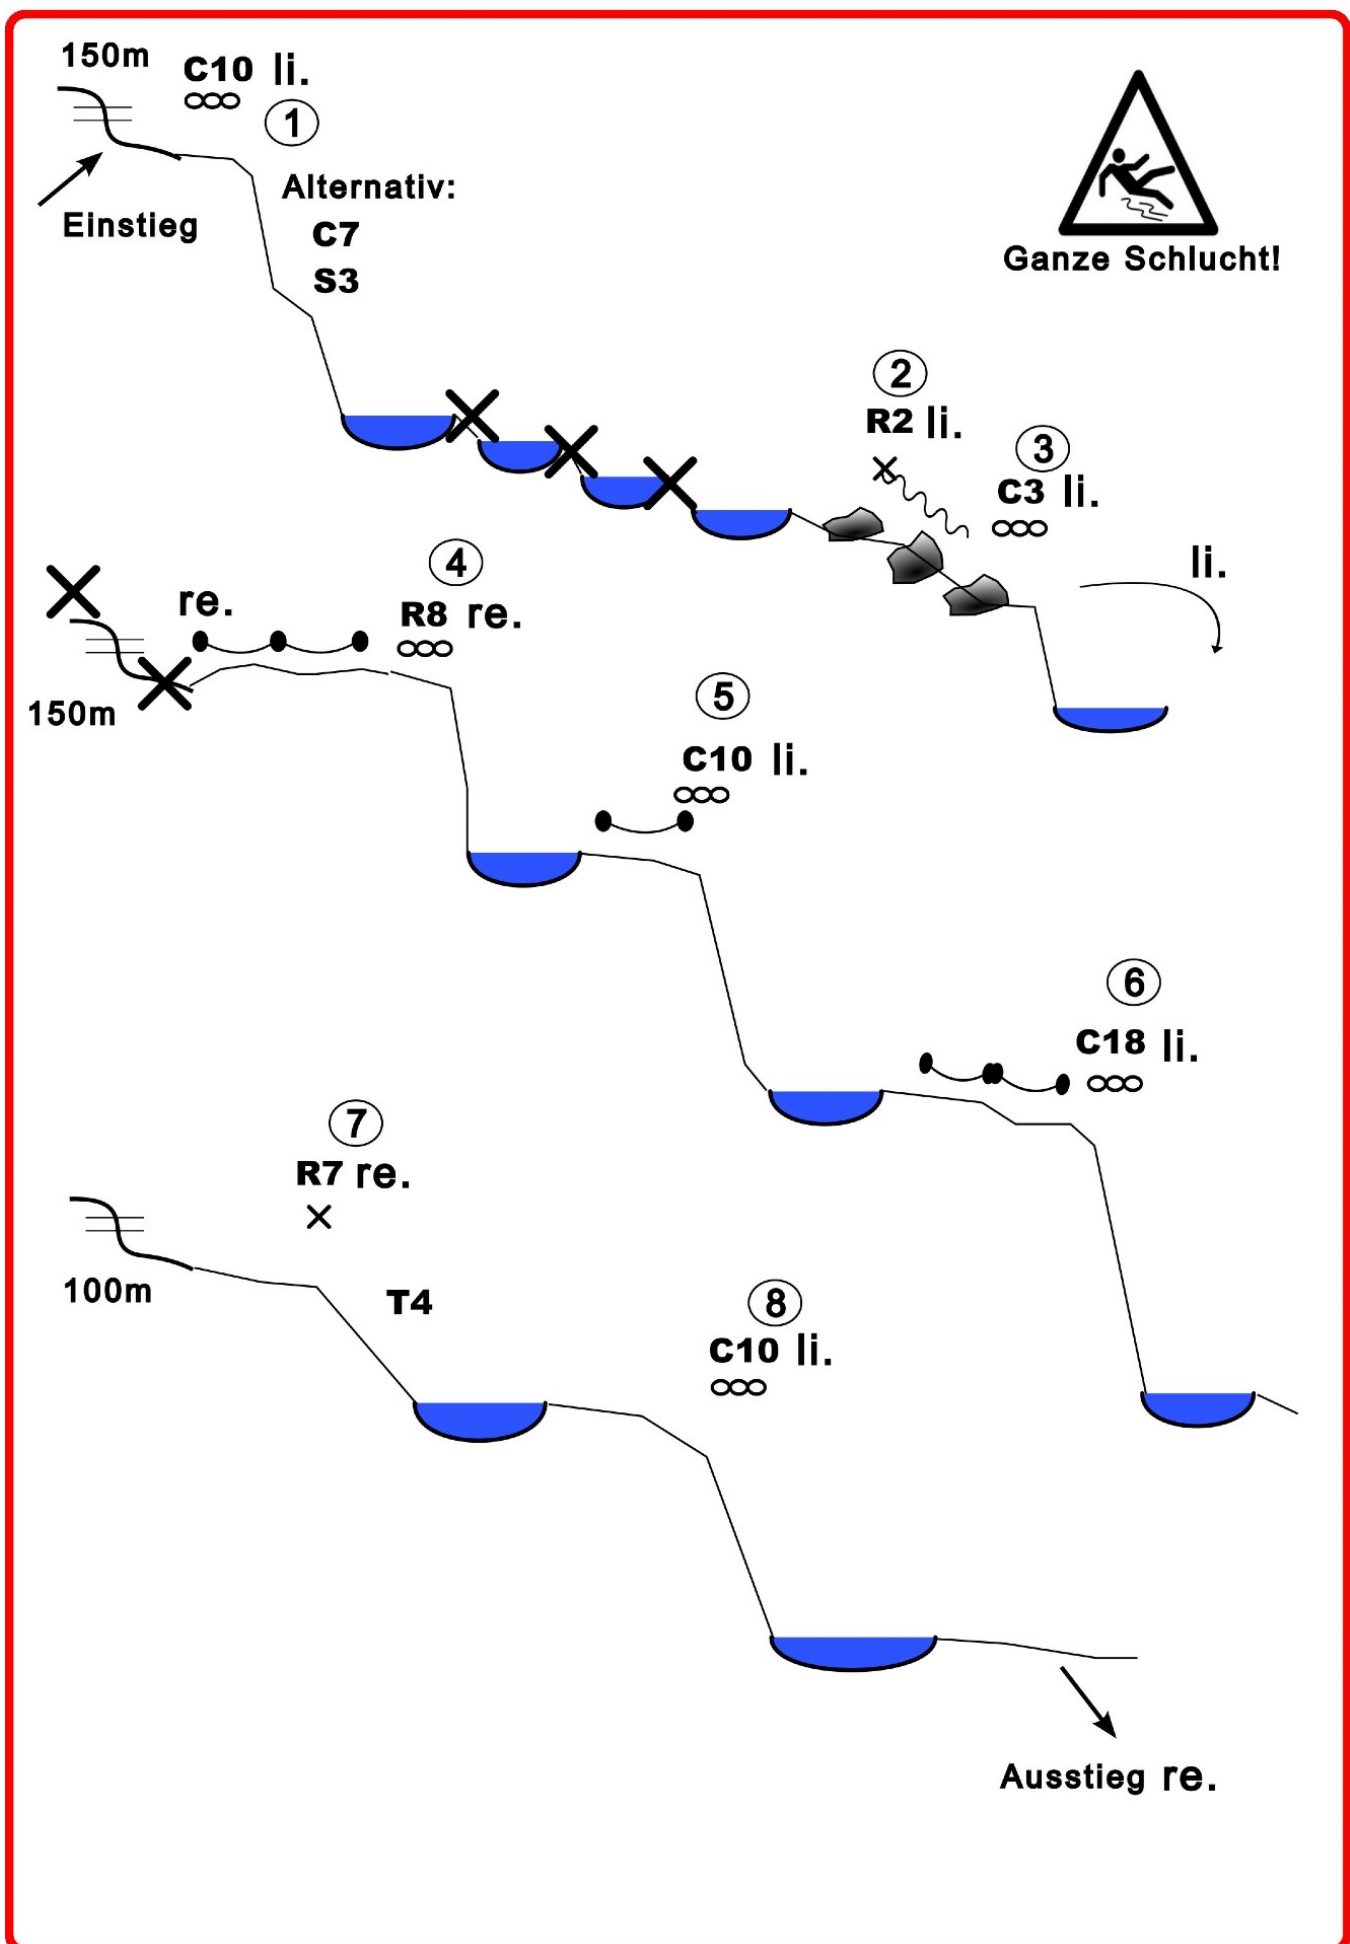

Very grippy! A rarity in the stream. Jump was possible. Water level unproblematic, rather high for the stream. (traduzione alternativa)
