<b>Accesso:</b> (traduzione alternativa) From Barbastro on the N-123, in the direction of Benabarre, Graus. We drive through the narrow section (Congosto) of the Rio Èsera. After 20.9 km from Barbastro - T - junction N-340/N-123 in the south of the town - the A-139 turns north towards Graus. We stay on the N-123 here, driving south along the reservoir and after another 16.4 km we come to the N-230 in the south of Benabarre. On the N-230, we first head north for a short distance, then east. After 6.3 km (from Benabarre) we see a pig farm (?) on the right, 2.7 km before the Torla exit. We turn right off the N-230 here and park our car where it won't get in the way. It would also be possible to drive to the canyon exit, but it is hardly worth it.		
<b>Avvicinamento:</b> (traduzione alternativa) We take the track, which initially heads east and then bends to the right (south) after about 100 m. First through fields, we later head SW towards the streambed of the Rio Seco. 70 m after the bridge, we turn left off the track and take the dirt road, later a path, which crosses the Rio Seco again and then heads south along its left bank. Before the path heads east, we descend to the right into the streambed and follow the trail to the first narrow section (entry)		
<b>Giro:</b> (traduzione alternativa) After the first narrow section and a running section in or next to the stream, we cross a second narrow section and then come to the Rio Cajigar. We walk downstream in the calmly rippling water, cross under a clamping block and come to the rock jam that marks the beginning of the canyon proper. We rappel down into the gorge (3 rappels) and enjoy the pools, the possible jumps, the rock formations and the ambience. Where the stream loses itself in a wide gravel bed, we climb out to the right onto a dirt path.		
<b>Ritorno:</b> (traduzione alternativa) We take this road to the right and it leads us straight back to our car on the N-230.

Automatisch importiert von Descente-Canyon.com für Canyon Cajigar Conditions parfaites, tout passe bien, canyon magnifique !!Pas mal d'eau, petit GD, on est content d'éviter le rappel dans le chaos du début par les cordes fixes (d'autant qu'on n'est pas sûr que ça passe avec le risque d'embâcles) + quelques mouvements d'eau gentilles dans qqes vasques.Sans navette, garés au parking amont classique à l'ouest de Tolva le long de la route nationale : approche en 50 minutes directement jusqu'à l'entrée du congost - en s'épargnant l'affluent bouseux - par un sentier balisé au top ; 45 minutes de retour par le GR. Last vacation canyon on the way to the airport. Rio Cajigar was quite nice, but not the rest. Didn't find the "good" access via Secco, or rather it's never possible in 15 minutes. (Bushes, thorns, no water ... everything you don't want) Possibly try another variant with shuttling from below (see decente description). Directly from Tolva into the Cajigar seems possible and recommendable - leave the Secco "on the left" (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Cajigar Avec navette , c'est effectivement plus sympa de partir depuis Tolva (sentier balisé et passerelle métallique en 35min ), cela évite le rio Séco .Des cordes fixes permettaient de remonter le congost depuis l'aval ce jour.Pour le parking aval , la piste RG parait meilleure malgré un passage à gué par rapport à celle RD plus caillouteuse . Automatisch importiert von Descente-Canyon.com für Canyon Cajigar We didn't descent the canyon, looks like medium or high flow judging from the exit water volume. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21702/observations.html>)

Only a trickle of water down, not descended due to stagnant pools. (traduzione alternativa)
