Probably one of the most beautiful and most visited canyons on the island.

Ritorno: (traduzione alternativa)
see left - requires a sense of direction. At an edge coming down from above, you are inclined to look for the way up. However, the path walks across the edge.

Before the last rappel, turn right and follow the barely visible path (marked with cairns, which sometimes disappear. Approx. 1.5 / 3 h depending on your sense of direction and ability to find your way.

Automatisch importiert von Descente-Canyon.com für Canyon Carrizales Approche 10 min, descente 2h, retour 1h15. Des bambous encombrent parfois la descente. Deux très belles étroitures dans une roche volcanique (c'est parfois sombre). Les obstacles non équipés passent bien en saut/en tobb/en désescalade.Sortie légèrement en aval du panneau. Le chemin de retour nous a semblé assez évident compte tenu des marques noires que l'on retrouve assez vite et des traces de passage.Très beau canyon, avec un paysage magnifique sur le retour (quelques passages aériens). Automatisch importiert von Descente-Canyon.com für Canyon Carrizales Superbe canyon complètement sous-noté à mon sens. Il mérite 3.5 ou 3.6 sans problème.L'encaissement est long et sublime, roche volcanique exceptionnelle, rappels magnifiques, sauts, toboggans et marche de retour vue mer entre les cactus dominant la gorge... Fantastique ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21626/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Carrizales Fait en combi de voile légère, très bon compromis poids / isolation. Plusieurs vasques ou il faut faire quelques brasses pour sortir, 5 petits sauts et pleins de petits rappels très sympa. Chemin de retour splendide. Automatisch importiert von Descente-Canyon.com für Canyon Carrizales Nice canyon, equipment in great conditions, some 3 or 4 jumps are not equipped. On the day that we went it was quite windy and cloudy so it was colder in the canyon but perfect walking back. Bring water and sunscreen with you!!!! We had an offline wikitrail GPS map to find the exit and it was tricky nonetheless since right now the only two cairns (Steinmännchen) are on the wrong path!! The actual path ist 20m further down on the right. The second half of the path is marked with white spray paint so it's easy to follow. It took us 5 and a half hours with lots of picture time and 15min way finding ????. The highest rappel is less than 20m (I could equip it with a 38m rope and there still was some left) have fun!! Automatisch importiert von Descente-Canyon.com für Canyon Carrizales Descente magnifique, équipement au top. La marche de retour est un peu pomatoire. Une trace GPS dispo sur le site de canyon espagnol est bien utile! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21626/observations.html)

Did the canyon as part of a commercial tour during a vacation in Tenerife. One of the few canyons with water. Jumps and the famous slide were possible. Very beautiful canyon, which has a special character with volcanic rock and cacti as well as the bamboo/slash. The way back is a bit special because, as described in the description, no boat trip was possible due to the breeding season. The walk usually takes around 2 hours, but we were back at the top after 1 hour. It has to be said that you have to climb a lot here and there are several places where there
