Specialità:

Attrezzatura:
Corde: 2x30m

Sintesi: (traduzione alternativa)
Varied lime canyon; several slides/possible jumps; exposure south/east; approx. 30m grotto with beautiful sintering (lamp not absolutely necessary); water at times somewhat turbid due to vegetation; nice 12m slide; several slippery spots; protection good (10mm Inox); several possible jumps.

Idrologia:

Accesso: (traduzione alternativa)
From Domaso head south until you reach the town of Leno. In Leno, take the first road on the right up Via S. Pellico (signposted "Santario dell Soccorso"). Immediately after the fork, keep left and follow the road uphill. At a crossroads keep right and continue uphill until you reach the church "Acquafredda" with a large parking area. Alternatively, choose the parking area at the exit to avoid having to walk back to the higher parking area in neoprene.

Avvicinamento: (traduzione alternativa)
From the parking lot near the church, first follow the paved mountain road "Via S. Benedetto" steeply uphill. After about 20min. there is a fork with a yellow arrow on the left. Here you leave the mountain road and follow the path/trail marked yellow on trees and rocks to the left above the canyon. After about 15min. the path leads to an abseil point attached to the tree into the stream.

Giro: (traduzione alternativa)
The Perlana inferiore is a discontinuous lime canyon rich in vegetation and mostly open, with several short rappels or possible jumps and slides. Between the steps, especially in the upper part, there are always shorter walking and downclimbing steps (some with small creeks). A beautiful 12m slide in deep pools and a small dark grotto with sintering in the middle of the canyon are the highlights of Perlana. Unfortunately, the grotto was completely clogged at the top at the actual rappelling point into the grotto during our ascent. However, a visit from below was possible. The canyon is also used commercially and is very popular due to the south/east orientation and several jumps and slides. There are several escape/entry points in the canyon. Normally, you get off to the right before the bridge, because after the bridge there are three rather uninteresting rappelling points (16m, 14m, 18m).

Ritorno: (traduzione alternativa)
Get off before the bridge on the right-hand side (private left). Then cross the bridge and follow the road to the left up to the church/parking lot (steep shortcut over cobblestones possible).
Alternatively, continue in the river till the bridge of the road and exit rigth after the bridge following a water pipe.

Torrente mai difficile con dei passaggi esteticamente veramente notevoli, inaspettato in questo luogo, evidentemente molto frequentato e quindi gli armi sono tutti buoni, abbiamo trovato anche alcune corde fisse

Beautiful single sections. The last 3 waterfalls are also worthwhile. Then directly left in the forest steeply up or right over walls out and on path between houses up. (traduzione alternativa)

Entrati dal Torrente Chisola e scesi fino al ponte. La portata alta di questo periodo non ha creato problemi. Ambiente molto bello!

We had a training day here focused on efficiency. The canyon can be approached in several ways. We followed the route on the left bank. We followed the path on the map up to the gorge. This path is quite exposed in some places. At the end of the path, there was a rope around a tree with a maillon. We descended from there and ended up in the canyon. We completed the entire canyon, including the last three waterfalls, in just under an hour and a half.
