Automatisch importiert von Descente-Canyon.com für Canyon Barrosa DEBIT CORRECT+ , le premier saut passe, la vasque de l'ejectable s'est engravée, il y a 1m50 de fond au pied de la cascade, je l'ai fait et atterri bien amortis ça passe mais il faut prendre de l'élan avant de partir dans le tob et rester le plus possible dans la gerbe côté droit du tob et vraiment bien amortir ou atterrir en plat sinon oubliez et descendez en rappel pour le reste quasiment tout passe en saut le 12 m du barrage excellent ! Enchaîné après Ordiceto et Trigoniero (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2866/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Barrosa Tout se passe très bien, sauf le toboggan volant qui n'est pas faisable (pas assez de profondeur... Pas plus que 1m) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2866/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Barrosa DC++ je pense, dommage qu'il n'y ait plus assez d'eau à la réception pour pouvoir faire le tob eject... Merci à Canyoning StLary pour le rééquipement après les crues de cet hiver. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2866/observations.html>)

After a storm rushed through 2 days ago, the water level was crazy, but everything was doable. Stands still available, although some are a little rusty or just a rapid link on a sling around a tree. Stands all possible outside the water jet. Superiore slippery rock, which makes crossing the river or downclimbing partly impossible at the water level or allows only limited visibility into the immersion pools due to the white water pools. Logically, there is also a little driftwood in some pools - but all in all a beautiful, aquatic canyon with cold water. (traduzione alternativa)
