Valutazione: ★ 3.5 (2)	Info: ★ 0 ()	Belay: ★ 2 (1)
Avvertenzas: <i>Divieto di accesso - Stagione di riproduzione degli uccelli (annuale 01.12. - 30.06.)</i>		
Specialità:		
Attrezzatura:		
Sintesi: (traduzione alternativa) Its real name is Barranco Pinzas. It is located in Vadiello, specifically in the sector of the basin of the Barranco de Isarre. The access is through the Mallos de Ligüerre. The ravine descends between conglomerates, with large chained rappels and dizzying views. It is the most complete descent, not only of this sector, but of the entire Guatizalema basin. Normally dry, the water only runs after rains. Prohibited between December and June due to nesting.		
Idrologia:		
Accesso: (traduzione alternativa) From the first parking lot of Vadiellos dam		
Avvicinamento: (traduzione alternativa) We start from the parking lot near the exit of the Isarre ravine, along a path with cairns that climbs the slope; after a while of climbing, we coincide with another slightly wider path that brings us closer to the equipped channel that will position us in the upper part of the Ligüerri mallos. The approach route and the views it gives us are magnificent. We observe to the left the descent to the ravine of Lazas and we continue in soft ascent towards the head of Escomentué. The high part of its head is very clothed with vegetation, advancing until the zone of entrance by the right margin.		
Giro: (traduzione alternativa) Quickly, there is a succession of short abseils and rappels chained with pools that generally do not cover more than the chest; we will not find anchors in all places, as I say, chained several rappels with sections of about 30m. At the bottom we see how the landscape opens up, until we reach the threshold of the rappels by which we will descend the cliff; short handrail and R50; head after 35m in important rubbing, but very precarious; a few meters below good installation on a wide ledge. There follow several long stretches alternating with some short ones, the terrain is rough. Some blocks introduce us in another area of short rappels; we find a double fixed ropes that will allow us to descend the last ledges until the last one, without equipping, by which we will abandon the descent, following the traces of a path on the left margin. We descend to the bed of the Isarre ravine.		

Ritorno: (traduzione alternativa)

We return along the Isarre riverbed, finding some short projections that can be climbed and later another one of about 12m to rappel. Continue along the riverbed to the vicinity of the ferrata del Palomo, on the left; we continue along its access path to the parking lot.

Great view, great Nagelfluh gorge. Neoprene pants are enough in summer, but don't forget sunscreen. (traduzione alternativa)
