Transporto: a piedi	**Tipo di roccia:**	**Area di ingresso:** 16.20km²
Stagione: giugno - ottobre	**Orientamento:** Sud-Est	**Tempo migliore:**
Valutazione: ☆ 4.4 (34)	**Info:** ★ 2.8 (24)	**Belay:** ★ 2.9 (30)

Specialità:
fun creek,

Attrezzatura:
Corde: 2x 25m

Sintesi: (traduzione alternativa)
Attractive fun canyon with lots of slides and possible jumps.

Idrologia: (traduzione alternativa)
https://www.hydrodaten.admin.ch/de/2436.html

The discharge rate should not exceed 400l/s! When it rains, the level paths extremely quickly.

Accesso: (traduzione alternativa)
Via Lucerne; about 20 km southwards then turn right off the highway in the direction of Interlaken, Sarnen. Approx. 3 km later, turn off again towards Alpnach. At the beginning of the village you cross the Chli Schliere on a bridge. Immediately after the bridge, turn right onto the dam road and follow the orographic right bank of the Chli Schliere upstream as far as you can (approx. 3 km to the Kehrplatz).

Description Shuttle: There is also a driveway on the orographic right side of the Chli Schliere up to the hamlet of Moosmatt (825 m a.s.l.) From here, largely horizontal access via footpath to the bridge (commercial practice).\nWith a second car, return a good 2 km along the access road. At the bridge, change to the other side of the stream and - initially along the banks of the Chli Schliere again - continue uphill in (6) serpentines until you reach a barn with a turning area after 3.2 km (from the bridge).

Avvicinamento: (traduzione alternativa)
From the car at the turning area near the barn (730 m above sea level), take the horizontal hiking trail in a westerly direction until you reach the streambed at the bridge - finally descending in serpentines.
If you only have 1 car available, drive as far up the orographic right bank as possible, finally along a gravel road to the indicated parking lot. At the exit of the gravel road, follow the path on the orographic right bank for just under an hour to the entry point at the bridge.

Giro: (traduzione alternativa)
So-called fun canyon; but when the water level is high, it is not always easy to swim out of some of the eddies. Be careful when jumping (Harakiri) into the third pool (S 3). Be sure to check the pool below the water surface as there is a rock that is invisible due to the turbidity of the water. Possible jumps are on the far right of the rock face, as there is a large rock under the waterfall in the remaining area.
At the 6th pool (C4/S3) you can jump and slide down the wall on the so-called jumpslide.
Heavily frequented commercially, especially in summer and at weekends. The flow rate should not exceed 400l/s! When it rains, the level paths extremely quickly.

Ritorno: (traduzione alternativa)
At the exit of the canyon at the first slide brake, turn right onto the path and continue to the car.

Everything's fine; the pool at the semi-dry slide between the cannon barrel and the 9-meter dive board has a depth of just over 1 meter. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Chli Schliere Crue récente, les bassins se sont rempli de gravats, mais les toboggans passent toujours et le premier saut aussi ! Des gros blocs ont bougé. Une main courante en moins, mais pas dérangeante, reste plusieurs options. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2869/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Chli Schliere Fait avec une navette. Si vous décidez de faire de même. Le chemin est en bas à droite du parc à lama. Le canyon est équipé avec beaucoup de cordes fixes, pensez à bien sonder, certains endroits peuvent être piegeux. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2869/observations.html)

Automatisch importiert von Schlucht.ch für Canyon Chli Schliere, Wasserstand: "0,125 m3 - gut" Verankerungen: "J-Anker sind nach dem Hochwasser alle noch da und unbeschädigt. Ansonsten viele Hakenleichen in der Schlucht. Man müsste mal gehörig den alten Schrott rausflexen." sehr griffig zu gehen. Fixseile wurden durch die kommerziellen Firmen bereits alle ersetzt. Pooltiefe muss kontrolliert werden. Sehr viel Kies in den Pools. Wir haben aus Sicherheitsgründen sehr viel abgeseilt. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1003-chli-schliere)
