Paese: France **Regione:** Occitanie **Sottoregione:** Gard **Città:** Lussan		
Difficoltà: facile	**Grado:** v1 a2 II	**Tempo totale:** 3h
Tempo avvicinamento: 15min	**Tempo giaro:** 2h30	**Tempo ritorno:** 15min
Altitudine di entrata: 215m	**Altitudine di uscita:** 90m	**Altitudine delta:** 125m
Lunghezza del canyon: 5200m	**Rapel più alto:** 6m	**Quantità rapelli:** 1
Transporto: Auto facoltativa	**Tipo di roccia:**	**Area di ingresso:** km²
Stagione: ottobre - maggio	**Orientamento:** Nord-Est	**Tempo migliore:**
Valutazione: ☆ 2.3 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialità:

Attrezzatura:
Corde: 1x 15m

Sintesi: (traduzione alternativa)
Aquatic river walk at the foot of a rock wall

Idrologia:

Accesso: (traduzione alternativa)
From Pont-St.Esprit at the confluence of the Ardeche and Rhone, head south on the N 86 to Bagnols-sur-Ceze (10.5 km). At the entrance to the town, turn right onto the D 6 and head west towards Ales. After 23 km on the D 6, turn right onto the D 979 and continue north for 2 km to Lussan. From here, take the D 143 in the (north-easterly) direction of Verfeuil. After about 2.5 km, turn left onto the D 787, on which you will reach the bridge over the Aiguillon a good km further on, where you can park one vehicle.
Take the second vehicle back onto the D 143 and continue in a north-easterly direction for 7.5 km to Verfeuil. Continue through the village for 3 km until you reach a crossroads and turn left here towards Goudargues. After approximately 3 km on the D23, you reach the hamlet of La Bstide. From the center of the village, head west as far as the condition of the road allows. Park the second vehicle here.

Avvicinamento: (traduzione alternativa)
From the location of the first vehicle at the bridge downstream, after about 800 m you reach the first pools.

Giro: (traduzione alternativa)
You should do the hike when there is still water flowing in the second part (best time April-May). If you only have one vehicle available, you can walk back on a path that branches off to the left shortly before the confluence with the Merderis and takes you back to the starting point in about 3 hours in a westerly direction. For more information, visit http://clementdom.free.fr/html/concluses_de_lussan.htm and consult the map mentioned above. About halfway between Lussan and Verfeuil, a small road ('tres Pins' or 'tres Tinos') turns off to the left (northwards), leading tourists to a viewpoint where they can enjoy a beautiful and informative view of the Concluses.

Ritorno: (traduzione alternativa)
After reaching the confluence with the Merderis stream that flows in from the left (orographic), continue following the Aiguillon on the left bank until you reach the dirt road that leads to the second vehicle in the direction of La Bastide.

Automatisch importiert von Descente-Canyon.com für Canyon Concluses Parcouru en mode rando entre la baume des boeuf et la baume de la fortune. Plutôt sympa et les quelques vasques résiduelles sont shuntables. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2442/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Concluses Parking randonneurs RD accès sous la barrière en bois et retour à la vielle corde orange (attention chutes de pierres) Le canal à droite de la cascade en dessous de la combe de bœuf coule bien (eau limpide).Attention à certains toboggans, ça rappelle en bas. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2442/observations.html)

2024-05-08 | System User | |🕮 |⚓ | 〰 Normale | 👍 Completato
Automatisch importiert von Descente-Canyon.com für Canyon Concluses Garé au parking des Concluses, descendu de la Baume des boeufs jusqu'à la fin, avec retour par le sentier rive droite. Qqs belles vasques sur la 1ère partie, puis pas mal de marche jusqu'au Portail. Ensuite, de longs biefs à nager, avant un final très esthétique dans une belle roche.Ca coule tout le long, je dirais environ 50 litres secondes à la baume des Boeufs et 10 litres secondes à la fin.Dans ces conditions, je suggère de ne pas prendre de corde, la seule vraie cascade étant aisément shuntable. Du coup vous pouvez vous affranchir de toute la quincaillerie !Et pour info, j'ai essayé de croiser l'historique DC avec la pluviosité du coin. A mon avis, les Concluses coulent s'il est tombé environ 50mm la semaine qui précède... (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2442/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Concluses Descente réalisée depuis la baume des Bœufs. Journée ensoleillée mais très venteuse, heureusement les bourrasques n'atteignait pas le fond du canyon. Belles conditions donc pour une très belle et ludique rando aqua. Malgré un débit correct, l'eau se perd assez brutalement à 300/400 mètres de la sortie mais ça ne nuit pas à l'intérêt de l'ensemble. Nous n'avons pas utilisé la corde. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2442/observations.html)
