Corde: 2x45m

Sintesi: (traduzione alternativa)
Watery (in spring) rappel canyon, tributary to the Saklikent canyon.

Idrologia: (traduzione alternativa)
The Bozudere usually carries plenty of water in spring. Nevertheless, it can happen that the water flow in the lower parts disappears from one day to the next. The reason for this may be that the water seeps into a cave in phases, but this is not obvious.

Accesso: (traduzione alternativa)
First head for the canyon exit of the Saklikent Gorge. Park your car here for the exit. If you don't want to pay a parking fee, park the car south of the river.\nFrom here, take the second car and drive north along the road. After 2.7 km, turn right and drive uphill towards Arsaköy. After 6.1 km uphill, we come to a road coming from the north and continue on this road to the right in a southerly direction. After another 3.6 km we leave the road to Arkasöy and turn half right (GPS: 36°30'24.75 "N 29°26'25.56 "E). We follow this road in a south-westerly direction. After about 1.8 km we come to a T-junction (GPS: 36°29'43.72 "N 29°25'47.79 "E) and turn right here. After 100 m the road turns left, 270 m further on the road bends to the left - a side road leads straight ahead, an elongated hall on the righthand side - and 570 m further on (GPS: 36°29'19.59 "N 29°25'56.43 "E - covered bus stop) we turn half right. We now continue slightly downhill for another 570 m. Here - GPS: 36°29'7.36 "N 29°25'59.65 "E - we turn right onto a dirt road to the left. After 620 m, the track crosses "our" stream. We now continue above the stream in a south-westerly direction. After 440 m (from the bridge) we stay right at a fork (near the stream). Another 820 m further on, we see a fountain on the left-hand side of the path. Here (GPS: 36°28'46.59 "N 29°25'42.35 "E) we park the car for an integral ascent. Access here as described for the Monster Canyon superior.
If we want to enter the lower part directly, we continue along the track and after about 900 m we come to a track coming down from the left. Follow this downhill to the right, as far as it is passable. We drove another 900 m and then parked the car (GPS: 36°28'15.71 "N 29°25'7.85 "E).

Avvicinamento: (traduzione alternativa)
From the latter parking lot, we walk across the meadows in a south-westerly direction towards the edge of the slope (GPS: 36°28'15.23 "N 29°24'59.90 "E). Here we look for a track that leads down to the saddle between Saklikent canyon (left) and Monstercanyon (right). From the saddle we follow the path that leads us in a north-westerly direction down to Bozudere inferiore (entry).

Giro: (traduzione alternativa)
First walk and downclimb until we reach the 1st rappel. This is followed by 6 more in narrow canyons up to 20m high. At the 8th rappel, a longer handrail is set up so that you can rappel past a hanging col with a dangerous siphon exit. At the exit of the narrow part of the gorge, the vertical part begins, which drops into the Saklikent Canyon. The highest rappel - around 60m - is broken (15m/40m). This is followed by 3 more rappels until we reach the bottom of the Saklikent Canyon.

Ritorno: (traduzione alternativa)
Once in Saklikent Gorge, walk downstream, then cross the tributary from the karst spring (can be difficult if there is enough water and without the rope usually stretched here in season) and then walk out on the footbridge above the river to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Monstercanyon (inférieur) Descendu après l'amont, ça fait une course d'une ampleur que j'avais pas encore connu. Il n'y a aucune marche, c'est que de la cascade-bassin. Quelques configurations sont engagées avec ce débit (100ls) et l'équipement même si récent n'est pas toujours optimal et sera vite rasé par les prochaines crues. Un des plus beaux et engagé canyon que j'ai pu parcourir. Je reviendrais faire la fiche plus tard (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23560/observations.html)
