| Sintesi: (traduzione alternativa) Very beautiful open and vertical lime canyon with views into the Bluntau valley; clean cold water; short rappel canyon with a kl. narrow section; several rappel points can be rappelled alternatively outside the water flow. !large catchment area | | |
| Idrologia: | | |
| Accesso: (traduzione alternativa) Coming from the A10 take the exit Golling and drive in the direction of the train station --> before the train station you drive over the tracks and bridge that leads over the Salzach --> immediately after the bridge on the left continue into the Bluntautal --> you follow the road to the bridge after the first large parking lot for hikers (Attention!!! on weekends and holidays the entrance is only allowed until 10am for cars). --> continue over the small wooden bridge and the forest road at walking pace to the Bärenwirt --> park at the Bärenwirt parking lot. | | |
| Avvicinamento: (traduzione alternativa) From the Bärenwirt follow the forest road over the bridge in the direction of Jochalmen --> after approx. 15 min. you will come to a small border hut --> at the fork in the road turn left in the direction of the waterfall --> after a short while you will cross a stream --> then continue to follow hiking trail 451 up through the forest (also possible via forest road) --> after approx. 10/15 min. you meet the forest road again --> here you take a shortcut over a steep forest road until you are back on the forest road again --> you follow this until the end --> at the point where the forest road ends, it is best to put on the neoprene and harness --> the entry is in the course of the forest road a little further above and is reached via a well-trodden small path next to the canyon (entry via fixed ropes and abseil point on the tree) | | |

Giro: (traduzione alternativa)

The entry into the stream leads over a sling around the tree where you dry rappel about 25m --> arrived in the stream follow three short slides which can also be jumped depending on the water level --> after that you would have a last steep exit possibility on the right before it then goes over an approx. 25m high dry rappel point (with rope traverse) next to the so-called cannon tube in a cavity down --> from the cavity it goes immediately approx. 7m incl. shower over the next mostly very slippery step --> for safety a rope traverse leads to the next chain anchor at the highest dry 30m rappel point in the canyon --> after a few steps there is a narrow point which can be easily passed by a fixed rope traverse --> the next approx. 20m rappel point runs directly in the water and has a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> a shallow pool follows (often felt with gravel)--> a short walking passages and small slide follows before one stands at the last cascade--> if the water level allows it, is rappelled here left approx. 15m into a beautiful cavity, followed by an approx. 10m step into the last pool--> alternatively, this cascade can be dry r. approx. 30m rappel--> then follow the shallow streambed mostly on the left side for about 15min. until you see a small wooden hut next to the streambed--> here rappel left out of the stream.

Ritorno: (traduzione alternativa)

From the wooden hut via the forest road back to the Bärenwirt (Attention! many MTB).

Ascent via the forest road, which goes off to the right at the fork. At the 3-penultimate haipin bend (where there is a rock) we walked across a small meadow to a tree, where we rappelled from a tree about 35m into the canyon. All stands in top condition. After the "cannon tube passage", the rope traverse and fixed ropes were also renewed. Slides/jumps were almost all too low to do. Only the jump in front of the cannon tube was doable (slight ground contact. You are currently not allowed to enter the valley from 10 am to 5 pm. You can go out at any time. It is controlled by a security guard! (traduzione alternativa)

Beautiful canyon. One belly of the built-in monkey rope bridge (stand 4) needs replacing. No driveway access to the service road leading to the parking lot on weekends and holidays between 10am and 5pm, once you're in you can of course drive out. (traduzione alternativa)

Attention: The belay in front of the slip-through is torn out. Must be re-drilled, only then is it possible to rope through again. Otherwise everything is ok. (traduzione alternativa)

Beautiful, clean (no trees), sunny canyon, too bad it's so short. An anchor at the "eye", through which theoretically you can drive pulled out, although with the current we found, it's still a rather nerve-wracking maneuver. Anyway, I recommend 5*. (traduzione alternativa)

Fixed ropes have been renewed. Everything is tip top Cannon tube and directly after it the rock hole through which you can now rappel are the highlights 📖 (traduzione alternativa)

Perfect weather & superiore canyons! Top water level and anchors. Fixed ropes at the bottleneck may need to be replaced. When rappeling after the narrow section, a cable car was built. Ascent 30min, descent 2h relaxed. A successful morning! (traduzione alternativa)
