Specialità:		
Attrezzatura: Corde: 2x 30m		
Sintesi: (traduzione alternativa) Relatively narrow rappel canyon in the core area, before and after running trails		
Idrologia:		
Accesso: (traduzione alternativa) From Nice on the N 202 in a northerly direction for 21 km along the river Var to the bridge Charles Albert. Here first a little further, go around the traffic circle and in the opposite direction back to the bridge. Over the bridge, then right and on the D 17 up to Gillette and further to Roquesteron (21.5 km from Gillette). Directly after Roquesteron, turn right onto the D 317 and up to Cuebris (3.5 km). Here before the village or at the end of the village parking possibility.		
Avvicinamento: (traduzione alternativa) At the northern end of the village, at marker point "84", a wide path leads down to the bridge over the Gros Riou. Continue along the track to marker point "88". Pass the small water basin and a little later take the path that leaves the slope on the left (cairn at the junction). The path crosses a stream and then ascends through a sparse pine forest. It then goes through a small rock face and we pass marker point "89". Here we turn left towards Bau de l'Arc and, walking downhill, quickly reach the streambed.		
Giro: (traduzione alternativa) After a shorter run, you come to the attractive rappels C10 and C25. After another 4 rappels you reach the level and a longer run begins before you exit to the right onto the meadows. You can also turn left immediately after the last rappel (C9) up onto the access path.		
Ritorno: (traduzione alternativa) Either return on the access path or on the orographic right-hand side of the stream, later on a slope through the stream also changing to the left onto the access path to the bridge over the Gros Riou. Here, either join the descent in the Gros Riou or walk up to Cuebris to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Clapoure La partie amont est vraiment top, par contre la deuxième partie n'est qu'une marche en rivière. Pas beaucoup d'eau au début, puis plus rien, puis de nouveau de l'eau. Intéressant à faire uniquement si on l'enchaînement avec gros riou (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22432/observations.html>)
