Attrezzatura:
Corde: 1x30m

Sintesi: (traduzione alternativa)
Aquatic great canyon under the "Caminito del Rey". Currently - 2023 - prohibited!

Idrologia:

Accesso: (traduzione alternativa)
From Malaga, take the initially 4-lane A 357 - past Cartama - in the direction of Ardales. Approx. 30 km from Malaga, we turn right onto the A 7077 and head north towards Alora (approx. 7 km from the junction). We take the new access road directly up to Alora, cross the village and continue northwards to El Chorro. Shortly before reaching the village of El Chorro, we do not take the road turning right at the barrage over the Guadalhorce, but continue for a few hundred meters to the restaurant on the left of the road. Park one car in the parking lot on the right and continue with the second car along the winding road until you reach the MA 444 coming from Ardales after about 4 km. Turn right here onto the MA 9006 and continue in a north-easterly direction for 2 km along the reservoir, drive through a short tunnel and park the second car about 100 m further on (see: http://www.wikiloc.com/wikiloc/view.do?id=6983141). Here a pedestrian tunnel leads through the mountain. Once the "Caminito del Rey" has been completed and reopened, access via this tunnel would be recommended. This would make the shuttle superfluous and enrich the tour. However, this option is likely to be lost due to the fact that the Caminito is only accessible in the direction from top to bottom (price 2016: 10 euros, available contingent fully booked for the long term).

Avvicinamento: (traduzione alternativa)
We walk through the tunnel - head torch useful - and come to the track descending from the 'Bar Mirador' and follow this downhill to the old Embalse de Gaitanejo power station. Passing this on the left, we come downstream to the northern exit of the canyon. Entry below the small dam.
There may be problems with the passage here due to the fencing of the Camenito del Rey.

Giro: (traduzione alternativa)
The Caminito del Rey, a path 'glued' to the vertical gorge walls at a height of up to 120 m above the gorge floor in 1920, is now accessible again (2015). It used to be used as an access or return route to the dams (Sanchez op. cit.), but access through the relatively wide railroad tunnels (see internet site) has been prohibited since 2003. The ban is also monitored by the police - as we found out in Nov. 2006 at lunchtime (you could be fined 3000 euros and temporarily arrested). If you do want to walk through the tunnels from the village of El Chorro, access is through a small tunnel 'window' in the (4th) long tunnel, through which you can reach the river bed directly above the entrance to the gorge (access time here 1 hour).
Warning: above the reservoir!
Exit at the end of Oct. 2006 and beginning of Nov. 2009

Ritorno: (traduzione alternativa)
After the final rappel (depending on the water level in the reservoir below between 4 and 11 meters. Jump possible from the top or from the middle) and the following narrow section, we climb out to the right to the vehicle parked first.

Coordinate:
Inizio del canyon 36.9319 -4.7874
Fine del canyon 36.9153 -4.7720
Parcheggio all'entrata 36.9299 -4.8007
Parcheggio in uscita 36.9124 -4.7659
