Specialità:

Attrezzatura:
Corde: 1x70m, 2x40m

Sintesi: (traduzione alternativa)
Airy rappel canyon

Idrologia:

Accesso: (traduzione alternativa)
We drive from Ainsa (city center) on the N-260 to Broto (40.3 km to the bridge over the Rio Ara. From the bridge we continue for another 2.6 km on the N-260 and then turn left in a northerly direction to Torla. We pass the town and 4.8 km after turning off the N-260 we come to a junction where we turn right into Arazas Canyon. However, we turn here into the upper Rio Ara valley and drive another 2.5 km to a bridge over the Rio Ara - Puente de Santa Elena. Here we park the car.

Avvicinamento: (traduzione alternativa)
At the southwestern end of the bridge, we take the path that goes downstream on the southern bank of the Rio Ara - Garganta de los Navarros. We cross "our" stream and can look at the "Salto del Carpin" in peace from below. We continue downstream until, after about 200 m, an old mule track on the right goes up at a sharp angle towards Puerto del Cebollar. The trail approaches the Bco. Cebollar and goes up its orographic right slope. Where it crosses the stream, we enter.

Giro: (traduzione alternativa)
9 - 10 rappel. The Salto del Carpin at the exit of the tour (120 m) can be rappelled with 70 m from the "stand" on the left of the wall on a wide band. From the orographic. right belaystation it is possible to reach a relay (of which there are several here) above the ribbon, in order to get onto the ribbon from there.

Ritorno: (traduzione alternativa)
Down to the approach path and upstream on the left to the road bridge.

Coordinate:
Inizio del canyon 42.6624 -0.1241
Fine del canyon 42.6654 -0.1208

Automatisch importiert von Descente-Canyon.com für Canyon Cebollar Fait à 8 . Gros frottement de cordes sur le 48 m. Nous et un groupe avant ont abîmé une corde. Déplacez la corde à chaque descente sur ce rappel. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21422/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Cebollar Très beau final ! Eau très froide en cette période de septembre après les gros orages. thermomètre à 5° au parking mais on voulait vraiment le faire.Fait en deux groupes. Le dernier rappel du saut, à partir de la rive, en RG passe sans trop de rab avec une 60m, en RD on s'est retrouvé trop court avec une 50m (on a suivi le topo), Heureusement un quatrième relais se trouvait sous le surplomb. Bien rouillé et sur de goujons assez fin, on a préféré y laisser un mousqueton. Prévoir une 60m !! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21422/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Cebollar Canyon vertical et esthétique ! Les amarrages sont en bon état mais certains pourraient être doublés. Grand fractionné passé en rive gauche (40m + 15m + 50m) ! Marche d’approche par le GR et non les clavettes !Tps de parcours à 7 pers. : 1h d’approche + 3h30 de canyon + 20 mins de retour (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21422/observations.html)
