Giro: (traduzione alternativa)
The canyon starts quite flat and offers a surprisingly beautiful and entertaining part right at the beginning. The rock is nice and smooth and there are even some opportunities for jumps and slides. As soon as the first part is finished and the first big waterfall is reached, the big adventure begins with huge and exposed parts. After the first 50m waterfall comes the huge 305m part, which is tackled in four parts ranging from 75m to 90m in length. The most impressive waterfall comes at the end. From a tree on the right bank, a 190m long rappelling route begins, at least 140m of which is free-hanging and directly in the waterfall. Use a good abseiling device and be prepared to tighten the rope for the first 100m.

Ritorno: (traduzione alternativa)
Follow the hiking trail orog. right towards Betlis to the car (if the 190m waterfall is made, otherwise follow the emergency exit)

Well doable with low/normal flow, but the final c190 gets you in the water & working whether you want it or not. Some of the most memorable minutes a canyoneer will ever have. A 2nd anchor for the intermediate 40+-waterfall would be nice. In the upper part some jumps are optional, but mind possible shallow pools. In short, to do once or repeat whenever possible :)

Anchors ok. The stream borders a wildlife sanctuary and the wall is home to endangered bird species. Gamekeepers and forest tenants do not welcome access. Protection period 1.12.-1.July (traduzione alternativa)

Too much ice and snow at the moment. We got out at the emergency exit before the high wall. We weren't sure what the second anchor on the Multi Pitch would be like. Possibly completely under ice as it was drilled in the dihedral. (traduzione alternativa)
