Sintesi: (traduzione alternativa)
A nice little canyon, good for beginners; it starts with low water levels and very easy rappels, and becomes increasingly technical, especially when the water from the Sionne joins it (at about two-thirds of the final flow rate). Currently (July 2022), the anchors are not in very good condition (one or two are missing, so you have to improvise using small trees), and there is a lot of mud in the canyon. (machine translation)

Idrologia: (traduzione alternativa)
Dashing has a small catchment area, whereas the Sionne has a larger one, but you can head upstream at the confluence of the Sionne if there’s too much water downstream.

Accesso: (traduzione alternativa)
Not far from the exit of the canyon is a parking lot with about 10 spaces.

Avvicinamento:

Giro: (traduzione alternativa)
There are a few rappels of up to 15 meters; unfortunately, the rock isn't very stable, and the stream often experiences debris flows, so the anchors are usually not in good condition.

In good condition. Pretty little waterfalls carved into beautiful, veined, schistose limestone. The start is on the right bank, downstream from the footbridge. Mixed equipment; check the condition carefully, as flash floods must be devastating given the size of the dam/screen at the end of the canyon. (traduzione alternativa)

Unexpectedly cool tour, but beware, the rock is very very bad, I was able to pull out an anchor with only 2 fingers. (traduzione alternativa)
