Valutazione: ☆ 2.9 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialità:

Attrezzatura:
Corde: 1x20m

Sintesi: (traduzione alternativa)
Aquatic swim and hiking canyon to the west of the Cotiella peak with smaller rappels, later from the left slope down the strong fill of a karst spring (Fuentes de Fornos).

Idrologia:

Accesso: (traduzione alternativa)
We drive north on the A-138 from Ainsa in the direction of Bielsa. We pass through Labuerda and Escalona to reach the bridge over the Rio Yaga (17 km from Ainsa, town center), where the Miraval canyon ends. We continue along the reservoir Embalse de Laspuña to Lafortunada (19.7 km from Ainsa, town center to here). Here we turn right, cross the bridge over the Rio Cinca and now park right in front of the village of Badan.

Avvicinamento: (traduzione alternativa)
We take the path to the "Fuentes de Fornos" (= "Fuentes Blancas") and follow the red and white markings of the GR-15 towards Saravillo. We go up for quite a while along the orographic right bank of the Garona (about 45 min.). There, where the Garona flows in a right angle to our slope side, we cross the Rio Irues, which flows in here, to the southern bank of the Irues. The path now walks along the orographic left bank of the Garona, but we turn left about 50 m after the river crossing and take a path that goes uphill in an easterly direction. We pass the upper springs "de Fornos" and walk on until the view of the Rio Irues and the "El-Chorro" spring at the foot of the other side of the slope opens up to us. Here we enter the path.

Giro: (traduzione alternativa)
First a narrow dark gorge with slippery rocks, smaller rappels, swimming sections and some possible jumps. We overcome a stone chaos. Then the spray cascades down from the left slope of the Fornos springs. Afterwards the canyon shows itself as a hiking canyon. So we walk out to the place where we had crossed the Rio Irues on the way there.

Ritorno: (traduzione alternativa)
Here, turn right onto the approach path and follow it back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Irués Ça goulotte avant les résurgences et DC + après. Eau d'une couleur exceptionnelle, belle balade aquatique, pas mal de marche en blocs, un seul rappel au début (saut possible mais délicat). Conditions au top, seuls (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21364/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Irués 1er tiers très beau puis longue marche bloc puis résurgences qui multiplient le débit par dix, passage joli puis toute la fin c’est bof.Un peu déçu de l’ensemble . (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21364/observations.html)

2025-08-03 | System User | |🕮 |⚓ | 〰 Normale | 👍 Completato
Automatisch importiert von Descente-Canyon.com für Canyon Irués Les vasques sont magnifiques malgré l'actif quasi inexistant jusqu'aux résurgences. Ensuite DC. Avec ce débit on a posé 1 fois la corde au début, 1 bout de 20m suffit largement. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21364/observations.html)
