Despite the recent rain, it was no problem at all. No meltwater in the evening. A beautiful canyon in the dark ;-) (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Jolibach Ça coulais correctement des la première cascade. Le bisse de luegil n'était pas en eau (il l'était lors de ma remontée à la voiture) j'ai croisé le gars qui gère les vannes de mise en eau ou décharge des bisses.Ca coulais donc bien depuis le début, mais passai sans soucis partout.La deuxième partie du canyon (captage au niveau de la seule échapatoire) était en petit débit, juste de quoi se rafraichir.Ancrages ok.Descente vraiment incroyable et variée. There’s a bit more water in the upper section. Down below, past the water intake, there’s significantly less. It’s still fun, though. In the upper and lower cut-in sections, it’s hardly slippery at all. In the middle, where there’s more sunlight, the wet rocks are covered with slippery algae. All the anchors and fixtures are in good condition. (traduzione alternativa)
