Paese: Schweiz / Switzerland Regione: Kanton Bern / Canton de Berne Sottoregione: Verwaltungskreis Interlaken-Oberhasli / Interlaken-Oberhasli administrative district Città: Lauterbrunnen		
Difficoltà: non così difficile	Grado: v3 a3 V	Tempo totale: 3h50
Tempo avvicinamento: 20min	Tempo giaro: 3h	Tempo ritorno: 30min
Altitudine di entrata: 1715m	Altitudine di uscita: 1475m	Altitudine delta: 240m
Lunghezza del canyon: 800m	Rapel più alto: 17m	Quantità rapelli: 18
Transporto: Cablecar	Tipo di roccia: limestone	Area di ingresso: 6.30km ²
Stagione: settembre - novembre	Orientamento: Sud-Ovest	Tempo migliore: 10-14 Ore
Valutazione: ★ 4.2 (10)	Info: ★ 1.8 (6)	Belay: ★ 2 (9)
Avvertenzas: <i>Divieto di pesca a Berna Caso C (annuale 01.01. - 15.07.)</i> Questo specchio d'acqua può essere utilizzato solo dal 16 luglio al 31 dicembre, in conformità con le norme di pesca del Cantone di Berna.		
Specialità: Ghiacciaio nel bacino idrografico,		
Attrezzatura: Corde: 2x20m		
Sintesi: (traduzione alternativa) 4/4; 0/2 Smileys Impressive partly narrow canyon		
Idrologia:		
Accesso: (traduzione alternativa) On the A8 highway, take exit 25 (Wilderswil) and then drive up the valley towards Lauterbrunnen. Cross the village and turn left shortly after the Weisse Lütschine towards the retirement home. Park at the exit of the road at a sports field or in the parking garage at Lauterbrunnen train station.		
Avvicinamento: (traduzione alternativa) From the parking lot, walk to the train station and take the train to Wengernalp station. From there, take the path heading east, which soon passes under the railroad line. Continue on the path down to the cable car station in the direction of Biglenalp. After the cable car station, follow the path that leads around a mountain ridge. Continue hiking downhill, still in the direction of Biglenalp, until you reach a footbridge over the Trümmelbach (water level control, 1739 m above sea level). Stay on the path on the right bank until the next bridge, where the canyon begins (1715 m a.s.l.). Install/check the exit ropes (1h30 to 2h round trip): Continue on the path along the stream, still on the right bank. After 200 m, you pass houses, then the path continues 200 m into the forest. Cross the fence on the left (pile of stones and red painted dots on the trees) and go down as best you can in the forest (follow the red markings), heading southwest, around small rocks. We walk to a hill (1615 m above sea level), still in a south-westerly direction. Turn left around this small hill and then descend to the south. Watch out for the canyon on the left. As soon as the path is too exposed, you should attach ropes to the trees. A first 65 m rope length in the grassy slope leads past a 4 m high rock. The second pitch of 55 m starts at a tree and leads over cracked slabs (4 cracks, watch out for the stainless steel bolts) down to the stream. When you have finished with the ropes, head back to the starting jetty.		

Giro: (traduzione alternativa)

After a canyon hike, the canyon becomes deeper. An inflow comes from the right bank. The slope is beautiful, abseils follow one after the other until you reach a 15 m high waterfall in a narrow crevasse, which can be a challenge when the water level is high. The canyon now becomes very narrow and dark until it widens near another tributary on the right bank. Long passages lead to a left-hand bend and a wider part with a few more obstacles and the confluence with the main stream. This is where the previously placed ropes are located. Do not go any further in the river (Trümmelbach IV): unless you are prepared. The route is long and can be dangerous as it is exposed to ice avalanches from the Giessen glacier on the left bank.

Ritorno: (traduzione alternativa)

Climb up the ropes and return to the hiking trails. From there, either return to Wengernap station (turn right to return to the path used on the outward journey) or turn left to hike back to Wengen (1h45) or Lauterbrunnen (2h50), following the hiking signs. Alternatively Trümmelbach IV.

Automatisch importiert von Descente-Canyon.com für Canyon Trümmelbach III Pas de neige dans le canyon, quelques plaques de glace au démarrage mais rien de compliqué. Tous les amarrages sont OK (même si certains sont très haut). Les cordes fixes sont en place et sont en super état. On est resorti par la (donc pas d'enchaînement sur trummel IV) L'encaissement est vraiment top (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22865/observations.html>)

Dry at the start, slowly more but ok! No ice or snow in the canyon. Escape ropes in place. Beautiful trip.

2025-10-30 | System User | |📖|📍|🌊 Normale |👍 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Trümmelbach III Beautiful setting. No snow or ice. Despite the melting snow no issues with the water level. All anchors ok. Fixed ropes in place (quality good, but almost too thick for microtraxion and tiblock!) Combined with part II (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22865/observations.html>)

Everything ok, amazing canyon...

2025-09-20 | Peisen |★★★★☆|📖★|📍★|🌊 Basso |👍 Completato

Good grip, exit ropes from last year are still good. We carried out the old ropes. Exit route or way to the ropes from above is difficult to find. Anchors in the canyon are very exposed, high up. At the moment it is worth taking the cable car at 09:00, then you have a lot of light and sometimes even sun in the canyon. (traduzione alternativa)

First part dry, but each affluent provided a small amount of water. Few new bolts. Most anchors only one bolt, but in good shape and well placed considering the line to rappel. Some anchors placed considerably high, but were reached quite easily. Exit ropes in place (see photo; although we did not use them as we continued IV).
