The access is not simply 'very steep', it is sheer horror. In fact a II-III grade exposed rock climbing with some sections of via ferrata on loose land. There is no real path, just a trace, very difficult to find (yellow dots hardly help, they are present at the very beginning and the very end only). You basically have to climb the wall as soon as possible. Now the water was very low, so the canyon itself was technically peaceful, but I can imagine that it is rather different in the spring.

Very steep walk-in scramble, took us a while to find it. Very slippery canyon but pleasant, sustained. Best in the immediate area.
