Specialità:		
Attrezzatura: Corde: 2x 30m		
Sintesi: (traduzione alternativa) With water flow very attractive rappel canyon		
Idrologia:		
Accesso: (traduzione alternativa) From Nice, head north on the N 202 towards Digne; after 20 km, turn right into the Vesubie valley towards Lantosque, Roquebillière. After approx. 14 km on the D 2565 you reach Suquet with its campsite and hotel. Immediately afterwards, turn left (D 373), then a little later turn right towards Pelasque. You pass the hamlet of Farguet. Shortly before reaching Pelasque, turn left at a fountain and at the exit of the road you come to the Hotel Auda (not open in 2025). Here you can park in the shade.		
Avvicinamento: (traduzione alternativa) Continue along the road, which is no longer paved, to the marker "143", where a path branches off to the left, which we follow. We walk - at least temporarily - along a dried-up water pipe, cross a stream and finally reach the bridge over the Figaret. We will get off here later. Now we climb steeply uphill, past the ruins of a mountain farm, until we reach the mountain shoulder at an altitude of 1030 m above sea level. Here we leave the path that continues to the right and descend on the other side to the streambed of the Bagnolar. On the opposite slope you can see a house in the hamlet of Les Barmes.		
Giro: (traduzione alternativa) Start in a small forest canyon, with the successive deepening the rappels also become higher. Some jumps possible. The Bagnolar is an attractive canyon, but only when water is flowing through it. As early as May, there is often only standing water in the pools in the lower part. In midsummer, a nose clip should be part of your equipment. In good conditions, however, the Bagnolar is one of the best canyons in the area. Narrow, wonderfully washed out and with beautifully shaped rappels and fun jumps and slides. You have the option of exiting to the left at about halfway down the canyon to join the ascent route. Unfortunately, it is forbidden to walk down the attractive Figaret.		
Ritorno: (traduzione alternativa) After reaching the Figaret, follow the stream uphill until just before the bridge a wooden sign to the right indicates the exit trail (approx. 5 min.). Shortly uphill to the access path and then on the approach path back to the car (another 25 min.).

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar SEC dans la deuxième partie, les vasques étaient pourtant praticables. Amarrages tout ok même si sec (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2229/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Marche d'approche facile à trouver mais bien touffue ! Plein de têtards surtout à l'entrée du canyon et à la fin. Ça demande pas mal de précaution pour pas trop les gêner. Équipement RAS. Un peu d'eau au départ, plus ensuite. Les vasques sont encore claires mais ça commence à verdier. Rien en décomposition et on est content ! Beaucoup de marche au départ avant le premier encaissement. De manière générale, on a trouvé le canyon surnoté. Il doit être très beau en eau, mais comparativement à d'autres ... mais bon très chouettes journée quand même ! On est parties avec 2x50m. Une seule 50 à permis de descendre la plus grande cascade (longueur de corde vérifiée il y a trois semaines). Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Superbe canyon, une première pour moi. La marche d'approche pique, mais ça vaut le coup. Fait en after work à 2, entrée dans le canyon à 19h00, sortie à 21h00. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2229/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Gigantesque et magique Une belle et grande marche d'approche (raide en deuxième partie) nous emmène dans un canyon aux allures de forêt enchantée. Le canyon ne présente pas de difficulté particulière et il y en a pour tous les goûts : de la marche en rivière, des sauts, des toboggans, des rappels, des désescalades, de la verticalité, de la nage dans des vasques et des parties encaissées à couper le souffle. La marche retour est bien plus rapide mais un peu raide au début. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2229/observations.html>)
