Valutazione: ☆ 3 (7)	**Info:** ★ 2.7 (3)	**Belay:** ★ 2.3 (4)
Specialità:		
Attrezzatura: Corde: 2x 25m		
Sintesi: (traduzione alternativa) Entertaining canyon suitable for beginners. Accordingly much frequented. Carries water for a relatively long time.		
Idrologia:		
Accesso: (traduzione alternativa) From Palma de Mallorca, follow the road towards Soller. Turn right at Bunyola and follow a winding road towards Orient. After the mountain pass, drive up several more hairpin bends before you can park after the last leftward haipin bend. It is also possible to approach from below from Santa Maria de Cami (http://www.wikiloc.com/wikiloc/view.do?id=3901753) See also parking lot		
Avvicinamento: (traduzione alternativa) Follow the marked hiking trail towards Santa Maria through a wide valley to the stream. Several karst springs emerge here, which soon plunge into the depths over a 25m waterfall, the Salt des Freu. Depending on your preference, you can enter above or below the waterfall. If the entry is below, a 30m rope is sufficient for the rest of the route.		
Giro: (traduzione alternativa) The 25m Salt des Freu is followed by another 15m waterfall (both can be bypassed on the left bank) before a longer walking passages begins with a few jumps and slides (if not dry). After about 400m the valley narrows again and the actual canyon begins with a 4m jump into a narrow basin. In the gorge there are many low rappel/jump passages up to max. 15m. Exit after a 5m drop formed by a large rock (slide right or rappel left). A gate in a fence is visible on the left.		
Ritorno: (traduzione alternativa) Go through the gate and follow the path to a picnic area. Turn left here and follow a beautiful path high above the canyon back towards Orient. The locals obviously prefer to climb back through the canyon - lots of canyons in the tufa rock.

Automatisch importiert von Descente-Canyon.com für Canyon Coanegra Fait avec un enfant de 7ans. La première cascade est super, coule bien et se fait avec un enfant + tob et sauts possible en bas. La marche de liaison se fait bien. Dans l’encaissement c’est quasi sec et des vasques commencent à se troubler. C’est bien encombré de bois donc très peu ludique. Bien surnoté dans cet état. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2846/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Coanegra Assez joli, un débit parfait ! Une chance !!Qq embâcles et marche un peu longue entre les cascades de départ et l’encaissementDépart un peu tardif dans l’après midi : fin de matinée aurait été mieux pour avoir le soleil dans le canyon : les enfants ont eu un peu froid.Info topo :Sur le chemin de retour, ne pas rater la bifurcation après les 2 premières épingles : rester sur le chemin du bas (cami de coanegra) et ne pas prendre le cami del comellar dels bouls (possible aussi mais plus long, sente mal définie, passage col à 620m et arrivée au village d’Orient) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2846/observations.html)

Great beginner canyon. The lower third of the first waterfall (picture attached) is a fun slide (climbing back is possible). Some jumps possible. Stands all ok. (traduzione alternativa)

Looks like beautiful canyon with water. In September was completely dry which can be dangerous since its hard to get out of some of the last pools if they don't have water. (traduzione alternativa)
