Automatisch importiert von Schlucht.ch für Canyon Vista Biasca, Wasserstand: "DC-" Verankerungen: "Gut" Nach dem Regen in der Nacht eine gute (und dank idealer Ausrichtung sonnige) Idee. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1168-vista-biasca)

Mostly easy to walk. Had to tighten one anchor, otherwise everything was tiptop. After 25mm of rain in 48h still little water. (traduzione alternativa)

For once with real water! Nice tour for bad weather/high water levels. All anchors in superiore condition. (traduzione alternativa)

Partly slippery to walk in the water. All anchors okay. The ropes on the bridges could be replaced on occasion. (traduzione alternativa)

Automatisch importiert von Schlucht.ch für Canyon Vista Biasca, Wasserstand: "niedrig - mittel" Verankerungen: "gut" Griffig zu gehen, schöner Blick auf Biasca; mal offen und sonnig, mal enger und grüner - wenn sonst überall zu viel Wasser läuft, lohnt sich die Tour durchaus. Nice and short alternative if there is otherwise too much water in the other canyons. At each of the bridges there is a chain link attached to the railing with ropes, which can easily be overlooked due to the very open canyon. Apart from the penultimate rappel with mini pool, the canyon can also be walked dry. (traduzione alternativa)

Not much for the otherwise quite high water levels. Very easy to walk. (traduzione alternativa)

Automatisch importiert von Schlucht.ch für Canyon Vista Biasca, Wasserstand: "mittel" Verankerungen: "Auf Höhe der unteren Steinhütte fehlt am Stand das Plättchen mit Ring. Gut so, der Bolzen ist sehr locker. Am besten vom Stand davor durchseilen (30+ m)" schön griffig, gute Alternative für "rote" Boggera und Nala. At the level of the lower stone hut, the plate is missing from the belay and the bolt is very loose. It is best to rope through from the belay in front of it (30+ m) (traduzione alternativa)
