Sintesi: (traduzione alternativa)
forest canyon

Idrologia:

Accesso: (traduzione alternativa)
Leave the Italian A 10 (Genoa - Nice) at the Arma di Taggia exit (roughly halfway between Imperia and Ventmiglia). Then take the SP 548 up the Argentina valley towards Triora. After about 16 km you will pass through the small village of Agaggio. About 400 m after the village you reach the bridge over the Boetto (with a few houses further along the road).
As there is practically no possibility to park your car properly here on the edge of the SP 548, drive up the steep concrete road on the right before the bridge and park next to the cemetery.
If you have a second vehicle available for a transfer, you can drive it about 500 m further along the SP 548 and then up a narrow private road as far as possible to Grattino.

Avvicinamento: (traduzione alternativa)
Go back down from the cemetery to SP 548 and continue on it to the houses on both sides of the road. At the last house on the right, a dirt road goes up in a northerly direction to a concrete water tank. Passing it on the right, we follow the following path in serpentines upwards. We then see another water tank on the left. The path always runs relatively close to the edge of the valley that the Boetto has ditched. It goes up and up and finally we meet the tarred road that crosses from Grattino. However, we don't go all the way up to the road, but a few meters before we take the dirt road that goes to the right (NNO) in a roughly horizontal way. After a while we pass some houses with vineyards around, we go on and come to two uninhabited houses with a small flat area a little above. From here a path enters the sparse woods and brings us to the streambed of the Boetto.

Giro: (traduzione alternativa)
Canyon is fairly open, offers some jumps and slides, but is otherwise underwhelming; emergency egress possible almost everywhere

Ritorno: (traduzione alternativa)
Before or after the road bridge, go out to the left and to the cemetery.
