Idrologia:

Accesso: (traduzione alternativa)
From Oloron-Sainte-Marie, take the D-919, then the D-918 towards Tardets(-Sorholus). 1 km before reaching the village of Tardets, we join the D-26 and follow it for 8.3 km in a southerly direction (Larrau, St. Engrace). Then turn left onto the D-113 and continue for 5.5 km to La Caserne with the Mairie (mayor's office) de Saite-Engrace. Immediately after La Caserne, turn half right off the D-113 and cross the river (Gave de Sainte-Engrace) 450 m further on. At the fork 70 m further on, stay right and continue up the canyon rim. In a hairpin bend to the left, we park our (possibly lower) car (400 m after the last fork).
With a second car, we continue uphill in a wide right-hand bend until we reach the upper parking lot in a leftward haipin bend (3.2 km from the lower parking lot) cf.: http://4.bp.blogspot.com/-HVFWE5znEu4/UlwbPaGi53I/AAAAAAAAMTI/G16gY9o1Ia8/s1600/Plano+Ourdaibi.bmp

Avvicinamento: (traduzione alternativa)
From here we follow the footprints that lead in a slight right turn down into the streambed.

Giro: (traduzione alternativa)
In the smooth washed limestone and clear water it goes downhill. Tree entanglement must be expected. Already in 1999 firmly installed handrails. Longer runs. Caution at the 28 m waterfall: hole in the chute under the water jet !

Ritorno: (traduzione alternativa)
After a 5 m rappel and about 250 m of walking, we see a metal ladder on the righthand side, over which we climb the right slope. Then it is only a few meters to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Ourdaybi Canyon parcouru à 2 en 2h. Pas de navette. Longue marche finale glissante. La majorité des MC est posée.Nous ne connaissons pas les conditions normales de ce canyon, mais proposons un petit débit. Automatisch importiert von Descente-Canyon.com für Canyon Ourdaybi Assez glissant, typique des canyons basques. SURTOUT le départ de la C25, ça peut surprendre ! Équipements en bon état mis à part un départ de main courante rive gauche après la C25 un peu rouillé. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2968/observations.html)
