Specialità:

Attrezzatura:
Corde: 1x30m/ 1x20m

Sintesi: (traduzione alternativa)
In contrast to the left tributary rather long, flat hiking and climbing canyon with a few short abseils, but if you are lucky with the gravel, you can jump a lot. Be sure to check the water level; very scenic; clean water; very jagged limestone.

Idrologia:

Accesso: (traduzione alternativa)
From Tolmezzo on the SS512 towards Carnia --> continue on the SS13 towards Tarvisio --> turn left at Moggio Udinese --> enter the village (follow signs for Ovedasso) --> cross a bridge and take the country road next to the river "Fella" until you reach a long bend on the left --> park your shuttle car on the left before the bridge over the Rio Alba (approx. 330m) --> take the 2nd car back to the village of Moggio Udinese --> from there continue to the next village of Praxis (477m) --> continue on an asphalted forest road towards "Casera Vualt" --> in a sharp left bend park on the right by a wooden board --> here there is also a steeply sloping forest road (approx. 730m).

Avvicinamento: (traduzione alternativa)
Follow the forest road downhill --> after a few hairpin bends the road flattens out. Continue on the road via a long haipin bend down to the streambed. The forest path that previously branched off to the right has now been marked with no trespassing signs.

Giro: (traduzione alternativa)
At the dam wall at approx. 610m there is a water level measuring station where you can read the water level --> !!!! If the water level is high, an automatic opening could be initiated --> 1st rappel from the dam wall approx. 25m (from the railing) --> longer walking passages to the narrowing canyon with small climbs --> walking passages in a narrower section of the canyon to the 1st rappel point in a beautiful rocky backdrop (right 10m) --> continue walking and climbing to the 2nd rappel point 20m (right) in a large gravel bed --> here the canyon opens --> continue walking and climbing to the 2nd rappel point 20m (right) in a large gravel bed --> here the canyon opens --> continue walking and climbing to the 2nd rappel point 20m (right) in a large gravel bed.) in a large gravel bed --> here the canyon opens up --> after a short section of walking and easy climbing you come to a very open passage with sloping large slabs of rock --> in a slight walking passages you overcome a chaos of rocks (inflow from the right) --> at the exit of the large boulders you come to a rappel point with approx. 10m (right) --> continue walking and climbing over some steps and rocks again until you come to a small waterfall on the left (left). waterfall on the left (left tributary of the Rio Alba) --> longer walking passages --> short downclimb approx. 5m --> beautiful striking point with high rock face and incised limestone rock which you walk around and downclimb on the left --> here the canyon makes a 90° left turn --> after a short time you come to an impressive cascade --> here you walk on a ledge (left) to a belay --> downclimb to a stand --> after a short time you come to an impressive cascade --> here you walk on a ledge (left) to a stand --> downclimb to the left (right).) to a stance --> rappel 15m --> the next rappel follows immediately approx. 10m to the right in the course of the water --> walk to the next waterfall on the left --> after a short shower you can take off your neoprene --> from here you walk along a very wide streambed for approx. 30min. to the bridge --> get off right at the shuttle car (approx. 310m).

Ritorno: (traduzione alternativa)
20-30 minute walk in the wide, gravel streambed. Get out of the streambed before the bridge.

Everything's fine. There was some gravel in a few pools at the start. About a third of the way through, a large amount of water joined the route from the right, and the run got a bit more aquatic. All the final jumps are currently doable. (traduzione alternativa)

We hiked the Tralba. Starting at the confluence with the Alba, all the pools are open and jumpable. (traduzione alternativa)

2025-08-24 | Tóth Attila | | 🕮 | ⚓ | ≈ Normale | 👎 Non fatto
Unfortunately, the dam above the canyon has been opened and the water is constantly washing the gravel behind the dam into the canyon. Making the hike impossible. It has almost certainly filled the pools as well.

Currently very good conditions. You can jump a lot, the pools are sufficiently deep. Good tour for beginners if you are fit enough for the long block climbs (traduzione alternativa)

A very beautiful canyon, which unfortunately contains a disproportionate number of sections in the stream. Video of the tour: https://www.youtube.com/watch?v=cyKOOlRycxo (traduzione alternativa)
