Specialità:

Attrezzatura:
Corde: 2x 80m

Sintesi: (traduzione alternativa)
Short, quite vertical canyon with 110 m final (30 /80)

Idrologia:

Accesso: (traduzione alternativa)
A13 exit 15 (Zizers) or exit 16 (Chur Nord). Continue to Trimmis.

Variant without changing parking spaces: Continue in the direction of Says to Valtanna.

Variant without parking / public transport: Parking near Trimmis Platz. Park 1 car there. Continue by 2 cars or by bus in the direction of Says to Valtanna.

Avvicinamento: (traduzione alternativa)
Follow the hiking trail towards Talein (signs), past a large meadow. At the exit of the meadow near a building, follow the hiking trail to the right down to the river. The path crosses the river and follows it to the first slide brake. Get in here.

Giro: (traduzione alternativa)
Five rappels, 2 of them at barrages, some rather small slides. Also geologically beautiful canyon, with crystalline, metamorphic rocks (gneiss / crystalline overburden).
The highlight is the c110 separated into two steps of 30 and 80 meters.

Ritorno: (traduzione alternativa)
Leave the canyon at Mühlenweg. A few meters to Trimmis Platz. If no second vehicle is available and there is no bus in the near future, it is best for the car driver without equipment to follow the road back towards Says in about 25 minutes on foot.

Automatisch importiert von Descente-Canyon.com für Canyon Val Tür Good bad weather option when all the other canyons are not possible. Last section is 30m, 15m, 60m. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22461/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Val Tür Dc-. Combo with valmola and valcosenz on a bad weather day. Nice last drop, but that's it. Anchors on river right on the 80m are slightly destroyed, river left works better and is +/- 15+60m. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22461/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Val Tür 11h drive up 12h30 start, 14h finish, 14h30 hitchhike back up to our car up with a friendly local. All anchors ok. Apparently a new anchor was recently added on the big wall left side just before the overhanging part. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22461/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Val Tür Soit nous avons raté le crochet au sol à gauche de la deuxième cascade lors de notre dernière descente, soit il a été remplacé.Neige à environ 1 600 m, donc froide. Un magnifique dernier canyon dans les Grisons pour la saison 2025. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22461/observations.html)

We overlooked the anchor on the 2nd rappel (1st after the dam wall) last week - it is on the left just above the ground. Unlike a week ago, we climbed it without reparking. Approx. +30 minutes for access or return. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Val Tür Attention : Le premier barrage anti-débris possède encore un ammarage à l'avant droit, mais pas la cascade suivante ! On peut descendre les deux d'un coup avec deux cordes de 30 ou une corde de 60. Les ancrages ne semblent pas très stables non plus ; à une cascade, par exemple, il y a trois pitons, mais que une seule plaquette. Just as beautiful as 2 years ago. Very short canyon, but worthwhile. Anchors at the 2 belay (1 after the dam) and at the intermediate belay of the C80 (to be able to go with 60 ropes) were no longer there. (traduzione alternativa)

Easy access on foot. 45 minutes. No more ice at 15 degrees plus and hair dryer. All anchors there. Nothing out of the ordinary. Nice final sequence. 2h15 car to car relaxed pace (traduzione alternativa)

All anchors available. Hardly any ice in the stream. The C80 is probably more like 70m. (traduzione alternativa)

All anchors are still there. At the moment the canyon is very grippy. (traduzione alternativa)
