Specialità:

Attrezzatura:
Corde: 2x30m

Sintesi: (traduzione alternativa)
varied - jumps, slides, rappel, climbing through tree stumps. Partly it looks wilder than it is. Pools often only very shallow!

Idrologia: (traduzione alternativa)
Rocky watershed; can be unpleasant during thunderstorms. Water levels can be checked at the bridge and at the weir.

Accesso: (traduzione alternativa)
Directly to the Haldensee. Choose the parking lot for Tauscher's Alm or Naturcamping at Haldensee as your destination.

Avvicinamento: (traduzione alternativa)
From the parking lot, cross the bridge and then turn right to follow the trail. You can check the water level at the slide brake or shortly after that at the small bridge. Then continue uphill along the steep hiking trail on the orographic right side, then follow the forest road until it crosses the Strindenbach at a bridge.

Giro: (traduzione alternativa)
The first third up to the A27 is relatively open, with small opportunities for sliding or making a possible jump into mostly shallow pools. The canyon then becomes more deeply incised and, after the 27-meter rappel, offers very nice steps with mostly shallow pools. However, there are some large log jams here that require caution. When the water level is high, deflection points can be used as rope traverses at critical spots to avoid the water. The anchors here are drilled quite high and may be harder to reach from below. However, all the higher anchors are now equipped with fixed ropes to make climbing up easier, making them very accessible.

At the exit, the stream surprises you once again with a slightly narrower gulch that offers a few nice slides.

Ritorno: (traduzione alternativa)
After the brick slide brake (last rappel directly on the concrete on the left), continue a few meters further until you can easily exit to the right onto the access path at a water extraction point on the left bank.

Everything looks fine so far. There's a lot of wood in some places. (traduzione alternativa)

Low water level (see photo), but all the slides are doable if you take it slow. The last jump before the bridge was also possible. Nothing out of the ordinary along the way. (traduzione alternativa)

Slides and a small jump (under the bridge at the end, where you can set up the rope traverse) are doable. New dead chamois in the upper section (oro li), but out of the water. Fixed ropes are also in good shape. Edge protection is advisable for some of the rappels. (traduzione alternativa)

Everything's fine so far, but it's very slippery to walk on. There are a few slides and small jumps you can do. It's a cool canyon for the area. Near the very bottom, there are two new small trees lying in a pool; a few people could probably remove them. If there were more water, they'd probably be a nuisance. (traduzione alternativa)

A little wooded. Lots of slides. Beautiful scenic views. A 30-minute walk at a leisurely pace. (traduzione alternativa)

We hiked the Strindenbach today when the water level was rather low. The ascent takes 35 minutes at a leisurely pace (not including a 5-minute break). It was a beautiful canyon right from the start. We had perfect, bright sunshine starting at 10:30 a.m. Since we had plenty of time, we checked out all the pools. All the slides were accessible. Two pools were 2.50–3 meters deep and suitable for jumping into. Even a 4-meter jump was no problem. Contrary to another review here, all the anchors were easily reachable for people 1.65m or taller. Climbing up was possible using a fixed rope. Toward the end, you just had to find the anchor in the center of the rock face; there was no need to reach the old anchor. The canyon is generally more than adequately secured. There are far more anchors and rappelling points than you need, since many sections could be traversed or downclimbed diagonally with ease. All in all, including breaks and everything else, it took us exactly 5 hours. We jumped and slid down several times in some sections and made full use of the stream. If you’re the same way, you might want to buy a longer parking ticket or park via the app. (traduzione alternativa)

Everything is in good shape. Some of the fixed ropes are new. There’s quite a bit of wood in some spots, but it’s all manageable. Some of the slides are doable. The jump hasn’t been tested. Beautiful canyon! Photo of the wall at the end, the high rappel, and the jump. (traduzione alternativa)

Surprisingly good for lime, many slides and a small jump possible. I drilled three more anchors in the lower part. (traduzione alternativa)

Anchorages and ropes are all in good condition. Today there was a little more water than "normal", but it still went very well. The pools were all covered in gravel (mostly only knee-deep), no jumps possible. Slides were no problem everywhere. Towards the exit there were a lot of branches in the stream, which also had to be bypassed in a more complicated way. Two anchors were in an awkward position, no idea how you would normally get there □□ A little improvisation helped All-round beautiful canyon at the start of the season (traduzione alternativa)

The slide in front of the big rappel is now doable again, the tree trunk in the pool could be removed and a fixed rope is still hanging. (traduzione alternativa)

Everything in order, upper pool, formerly accessible by jump, now blocked by two trees and completely covered
