Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)

Short and simple descent that very few people do due to its distance and small size. All the rappels are equipped with parabolts except the last one, being able to use a tree as a natural anchorage. The best season to make the descent is between November and April because in summer it dries completely.

Accesso:

Avvicinamento: (traduzione alternativa)

After leaving the car in the parking lot of the Hoz (it is really an end of track), we advance along this road following the signs and indications to Hoz de Carboneros. After about 2 kilometers we leave the track and take a path that will take us directly to the gorge after crossing a stream. The path is not lost given the frequent passage of hikers in the area.

Once we reach the first waterfall we turn right to ascend a cliff a few meters to reach the second waterfall. From here we turn right again to ascend through a narrow and earthy channel. Once we overcome it we continue advancing in half slope going up the creek and crossing a rocky ridge with some climbing (II). Once over the ridge we descend to the riverbed and we will arrive at the first rappel.

Giro: (traduzione alternativa)

Before the first rappel there are two small waterfalls with their respective pools. They are not very attractive but if you want to go up to the top to warm up, it is also a good option.

1st rappel (right) 15m: two parabolts with a double ring. The rappel becomes vertical as we descend with some small overhangs.

We advance about 300m over easy terrain until we reach the next rappel.

2nd rappel (left) 9m: two single-ring parabolts. Very steep rappel that connects directly with the third rappel.

3rd rappel (right) 20m: two parabolts with single ring. The longest and most beautiful rappel. Like the first one, it becomes vertical as we advance.

We continue about 200m until the last rappel.

4th rappel (left) 9m: unequipped, it can be mounted on the tree that is located right on the edge of the waterfall. Short rappel and something lying down.

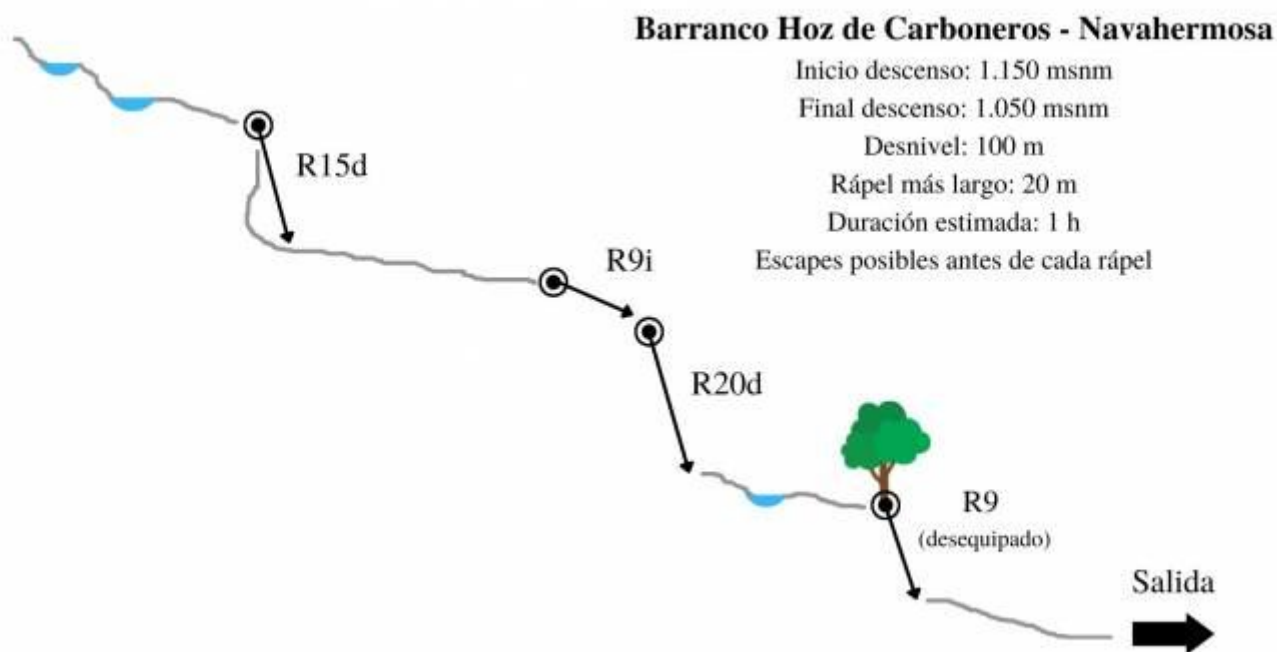

Ritorno: (traduzione alternativa)

It is done by the same approach path.
