Automatisch importiert von Descente-Canyon.com für Canyon Fallenbach DC++, en fin de crue apparemment. Très sympa. Fait sur la route des Grisons (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23671/observations.html)

Anchorages clear Good flow after the previous day's rain. Don't forget to remove your rucksack for the descent. It's now possible to do the last 3 C15 C3 C15. C3 not equipped but it's a slide. Super slippery. (traduzione alternativa)

Nice short canyon. Anchors were in good condition. Water level was higher than known from the Swiss Canyon Vol.1 due to the melting snow. Leave the ropes shorter on the first C17. On the C55, if you rappel it in one piece, you should cross the water jet in time in the lower third, otherwise you will end up in the chute and behind the waterfall, where it was possible to stand during our ascent. We saved ourselves the last C15, C3 & C15 and bypassed this section. The 20m fixed ropes on the tree were in good condition. (traduzione alternativa)
