Tour to the Sulzer Waterfalls. The entry is selective: after the second bridge, head down into the streambed on the orographic right side. The first downclimb comes immediately after 50 meters. Then, with only a few short walking passages, there's a sequence of rappelling points, slides, and jumps. The pools have great depth in some places and are silted up in others. Therefore, be sure to check it out. Current topos to follow. I cannot agree with the description by Bavarian Canyoning. There were single anchors at 2 rappelling spots, the rest were chain anchors. There were anchors at every relevant spot. None of them were bent, though one was rusted. At two rappelling points, a rope slide is possible and allows for some really cool rappels. A rope traverse at the penultimate rappel to the chain anchor can be set up if needed. Much more fun, however, is the single hook on the orographic left, which, after a short rappel, leads directly through the waterfall and gives you a proper shower. The pool is also deep enough to slide on and for S10. So let go into the waterfall and have fun☺️ (traduzione alternativa)

Tour was added after the Sulzer waterfalls as a supplement. Anchors were either bent, missing or very old. However, a few were also in very good condition. Unfortunately, only the first and last ones were suitable for jumping. Very good diving, as most of the pools were hip/chest deep at most! If you don't want to be filmed and photographed all the time, you're in the wrong place, as the hiking trail runs right next to the canyon, where there are lots of hikers with cameras! If, like us, you want to do the tour after the Sulzer waterfalls, it is advisable to hike downstream on the hiking trail for some time until a jumpable pool appears under a bridge and the walls of the canyon become steeper and steeper, otherwise you will unnecessarily undertake a huge river walk! Great worthwhile addition after the Sulzer waterfall. Unfortunately, the first slide & plunge pool is covered in gravel. (traduzione alternativa)

Whether coming from the Sulzer waterfall or from the hiking trail, do not start at the top of the waterfall. Otherwise a relatively long block climb between hikers taking a dip. It is easier to go down from the waterfall on the hiking trail until it crosses the canyon for the first time with a bridge. After the bridge, you can start about 50 m further on when a small stream comes from the right. Here the path is also reinforced with wood and many hikers have already stepped down here. The penultimate rappel (chain anchor on the right, accessible with an access rope) can be jumped or slid from the path. (traduzione alternativa)

We were in Sulzer Waterfall and had parked a car at the ball mill. We originally wanted to take the hiking trail along the gorge, but very quickly realized that the canyon is very well set up and the canyon as a whole is worthwhile. Clear water, great pools with beautiful jumps - a superiore combination with the Sulzer waterfall. (traduzione alternativa)
