Sintesi: (traduzione alternativa)
Raw data import from Descente Canyons https://www.descente-canyon.com/canyoning/canyon/22788

Idrologia: (traduzione alternativa)
Not too large a catchment area, but with a glacier, so only possible from late summer.

Accesso: (traduzione alternativa)
Parking at the Gigerwald reservoir.

Avvicinamento: (traduzione alternativa)
On foot First follow the road until you reach the junction. Then turn left up the hiking trail to Panäraalp. You can start at 1730m, 1820m or 1860m.

Giro: (traduzione alternativa)
Not the best rock at the beginning, but very continuous. The middle section is the best. The exit is a 60m climb through the "window", but there is a high risk of falling rocks.

Ritorno: (traduzione alternativa)
Depending on the water level of the lake, it is not so easy to get back onto the road.

All the climbs are great. A beautiful canyon with cool rock formations. The access path has been redone; it’s wonderful to hike but extremely steep in places. (traduzione alternativa)

At the top already ice next to the water, not pleasant to walk, at the 60m below a lot of unstable blocks, something fell down and cut the rope directly. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Panäratobel Le plus long de la zone, superbe vue sur le lac turquoise toute la descente. Approche qui défonce. Peut être jumelé avec ceux du coin. Enchaîné avec Glasbach et Parlitobel. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22788/observations.html)

Missing anchors were replaced and loose ones tightened again. If the last rappel is done completely, 2 60 mm ropes are required. (traduzione alternativa)
